

BetiLife Invites North American Partners to Evaluate Its RDWC System Line

BetiLife: North American RDWC System Supplier and Wholesaler

DENVER, CO, UNITED STATES, September 9, 2026 /EINPresswire.com/ -- BetiLife™ is inviting hydroponic retailers, grow shops, distributors, and dealers in the United States and Canada to evaluate its 7-Gallon / 27L recirculating deep water culture (RDWC) system line. The company offers a single-system evaluation path before an opening inventory order, alongside configuration and quotation support for commercial growers and original equipment manufacturer (OEM) project buyers.

The invitation comes as protected agriculture combines growing sales with rising operating costs. U.S. sales of food crops grown under protection reached \$1.011 billion in 2024, 44% above 2019, according to USDA. Statistics Canada reported that greenhouse operating expenses rose 4.3% to C\$4.2 billion in 2025. These figures describe the broader cultivation sector, rather than the RDWC equipment market.

BetiLife's standard lineup includes BLGX-04, BLGX-06, BLGX-08 and BLGX-12, providing four, six, eight and 12

BetiLife Invites North American Partners to Evaluate Its RDWC System Line

planting sites, respectively, plus a separate reservoir. The shared bucket platform gives retailers four capacity options for customers moving beyond standalone deep water culture buckets or assembling systems from individual components.

Each standard model includes planting buckets, a reservoir, water and air pumps, recirculation plumbing, air delivery components, fittings, and integrated drip irrigation hardware. Central reservoir management connects the planting sites through a shared nutrient-solution loop, while the drip function provides early-stage root-zone moisture support. Exact accessories are confirmed in the model specification and order quotation.

12 Buckets RDWC System 7-Gallon/27L

Published U.S. suggested retail price references range from \$599 for BLGX-04 ([4 Buckets RDWC System](#)) to \$1,499 for BLGX-12 (12 Buckets [RDWC System](#)). Evaluation and wholesale quotations are prepared separately, with model mix, quantity, destination, and shipping terms considered before an order is finalized.

Qualified retail and distribution prospects can begin with one representative evaluation unit to assess construction, packaging, assembly, circulation, and support. The dealer guide identifies BLGX-06 and BLGX-08 as potential evaluation models, depending on the store's customer base. Partners can then select an opening inventory mix without initially stocking all four models.

Dealer support includes product photography, specifications, listing content, installation guidance, troubleshooting, and replacement-parts assistance. Eligible components carry a one-year limited warranty, subject to the applicable terms. The program is intended to help retailers introduce the product category and address technical questions after the sale.

For commercial growers, system selection starts with plant count, available floor space, and operating requirements. Projects exceeding 12 sites may be reviewed for multiple independent standard modules, with reservoir access and maintenance space considered before configuration. OEM and private-label discussions, including branding and packaging, are available for qualified volume programs, subject to project review.

BetiLife coordinates operations, quality-control follow-up, and exports from Dongguan,

Guangdong, working with qualified manufacturing partners in China and export shipments through Shenzhen Port. Delivered Duty Paid (DDP) and Free on Board (FOB) quotations are available for review; availability, lead times, and delivery terms are confirmed for each order.

Interested businesses can request a dealer evaluation or project quotation through the BetiLife website. Providing buyer type, company name, model or plant count, estimated quantity, and destination country or ZIP code helps the team prepare a relevant response.

About BetiLife

BetiLife™ is a hydroponic equipment brand ([RDWC supplier](#) and wholesaler) operated by HONGKONG BETILIFE TECHNOLOGY CO., LIMITED. The company focuses on RDWC system development, manufacturing coordination, and international B2B supply for retailers, distributors, commercial growers, and project buyers.
