Robooter to Showcase E60 Pro GT and C40 Smart Mobility Chair at Abilities Expo Orlando 2026

Robooter will present its E60 Pro GT power wheelchair and C40 mobility chair at Booth 200, offering attendees hands-on access to its latest mobility solutions.

ORLANDO, FL, UNITED STATES, September 10, 2026 / EINPresswire.com/ -- Robooter, a smart personal mobility technology company, will exhibit at Abilities Expo Orlando 2026, taking place October 9-11, 2026, at the Osceola Heritage Park Events Center in Kissimmee, Florida. Visitors can meet the Robooter team and experience its latest mobility solutions at Booth 200.

At Booth 200, visitors can explore the E60 Pro GT all-terrain power wheelchair and C40 3-in-1 smart mobility chair, and learn how different designs can support everyday indoor mobility, outdoor travel, caregiver assistance and greater independence.

Robooter's Orlando appearance follows its participation at Abilities Expo New York Metro earlier in 2026, where attendees explored the company's E60 series, lightweight E80 and then-unreleased C40. The company will use the Orlando event to continue gathering direct feedback on personal mobility needs and product development.

Robooter E60 Pro A outdoor

E60 GT Pro All Terrain Power Mobility for More Everyday Possibilities

The E60 GT Pro is Robooter's next-generation all-terrain power wheelchair platform, designed for people who want to travel more confidently beyond smooth indoor surfaces.

Built on the E60 series, the E60 GT Pro combines a dual-motor drive system, omnidirectional wheels, suspension, integrated controls and a design intended to support longer outdoor journeys. From grass and gravel to uneven sidewalks and outdoor paths, the E60 GT Pro is designed to help users navigate changing everyday terrain with greater ease.

"Mobility should not stop when the pavement does," said a Robooter spokesperson. "Our goal is to give users more confidence to go farther, explore more places and stay connected to the life they want to live."

C40 A 3-in-1 Smart Mobility Chair for Everyday Flexibility

Robooter will also feature the C40, a 3-in-1 smart mobility chair designed to adapt to different everyday situations.

The C40 combines electric driving, assisted pushing and manual use in one platform. Its compact upright-folding design is intended to make storage, transport and maneuvering in tighter indoor spaces more convenient for users and caregivers.

By integrating multiple mobility modes into a single chair, the C40 is designed to support independent travel, caregiver-assisted movement and flexible use at home, in the community or while traveling.

Robooter will also preview a mobility scooter solution at the Orlando show, expanding the company's personal mobility portfolio and inviting direct feedback from attendees on future product development.

From Hands-On Experience to Online Access

Abilities Expo Orlando is part of Robooter's continuing expansion in the U.S. consumer market. Earlier in 2026, the company launched Robooter.us, its official U.S. direct-to-consumer website. The website provides product information, customer support and warranty-service information for Robooter mobility products, including eligible FDA-cleared Class II power wheelchairs.

Robooter products are also available through the company's Amazon channel, giving U.S. consumers additional ways to research and purchase personal mobility solutions online.

By connecting in-person product demonstrations with online access, Robooter aims to make

advanced mobility technology easier for users and families to understand, experience and evaluate.
