

Septem Studio Launches GrilTi EVER Pack-Flat Camp Grill on Kickstarter

The 1.5 kg grill packs to 8 mm, sets up in 30 seconds, and connects with additional units when more cooking space is needed.

NEW YORK, NY, UNITED STATES,
September 13, 2026 /

EINPresswire.com/ -- Septem Studio has launched [GrilTi EVER on Kickstarter](#), a 1.5 kg pack-flat camp grill designed to combine compact transport with a full outdoor cooking setup.

Unlike portable grills with a fixed cooking area, each GrilTi EVER works as a complete standalone grill while also allowing additional units to be connected side by side when more cooking space is needed.

"We kept coming back to one question: why should cooking space stay the same when every camping trip is different?" said [NAME/TITLE] of Septem Studio. "We wanted one grill to work on its own for a smaller trip, while giving groups the option to connect additional units when more people join."

A single GrilTi EVER weighs 1.5 kg and packs down to approximately 8 mm thick. Its tool-free structure can be assembled in approximately 30 seconds, allowing the grill to be transported as a slim, flat-packed system and assembled at camp.

Once assembled, GrilTi EVER provides two cooking zones. An open grill zone supports direct-flame cooking for foods such as steaks, burgers and skewers, while a solid cooking plate provides a separate surface for searing, frying, heating cookware and preparing breakfast or coffee.

The grill also incorporates a 3-level fire-control system. Removable side panels change airflow around the fuel to provide lower, medium or higher-heat configurations. The panels also help

provide shielding from wind during use.

GrilTi EVER's main cooking surface is made from commercially pure titanium, selected for its corrosion resistance and non-reactive characteristics. The cooking surface contains no painted or coated layer between food and the heat source.

The system supports lump charcoal, charcoal briquettes, wood chunks and firewood. A removable lower tray contains fuel and ash during use and can be removed for cleanup after the grill has fully cooled.

The modular construction also allows multiple GrilTi EVER units to form a larger shared cooking area. Campers can use a single unit independently or connect two, three or additional compatible units depending on the amount of cooking space required.

GrilTi EVER is Septem Studio's 19th Kickstarter project. The studio has previously completed 18 Kickstarter campaigns supported by more than 20,000 backers across over 85 countries.

The GrilTi EVER Kickstarter campaign is currently live.
