As India's Labs Go Digital, Coherent Market Insights Steps in as Knowledge Partner for analytica Lab India 2026

A market intelligence report, a CXO panel, and a presence on the exhibition floor — CMI's three-part role at Hyderabad's flagship lab-tech fair.

BURLINGAME, CA, UNITED STATES, September 9, 2026 /EINPresswire.com/ -- Hyderabad, India, September 2026: Walk into most Indian pharmaceutical or diagnostics labs today and the conversation has shifted. It's less about whether to automate and more about how fast, and with what level of integration. That shift forms much of the backdrop for analytica Lab India 2026, and it's why Coherent Market Insights (CMI) has come on board as the event's Knowledge Partner this year.

> “CMI's session will present market intelligence on Lab 5.0, followed by a CXO panel bringing together leaders from Aragen Life Sciences, Sapien Biosciences, Smilax Laboratories, and Garphi Biosciences.”
>
> *CMI*

The trade fair, organized by Messe Muenchen India Pvt. Ltd., takes place from September 10 to September 12 at the HITEX Exhibition Centre in Hyderabad. For context, last year's edition, co-located with Pharma Pro&Pack Expo, brought in over 32,000 visitors from more than 25 countries and 650-plus exhibitors across seven halls at HITEX.

CMI's contribution to this year's show centers on September 11, with two connected sessions, both scheduled in Hall 5.

At 2:00 PM, the program will begin with a market intelligence presentation by Mohit Shrivastava, AVP – Research & Consulting at CMI. He will present CMI’s new report, "Lab 5.0 in India: Laboratory Automation, Informatics and AI Market Opportunity, 2026–2033," which maps out where laboratory automation and AI adoption could be headed over the next several years. The 30-minute session will focus on the data and developments shaping this transition.

At 2:30 PM, Shrivastava switches roles from speaker to moderator for a 50-minute CXO panel titled "India's Laboratory & Scientific Ecosystem: Accelerating Innovation through Advanced Analytical Technologies, Digital Laboratories, and Industry Collaboration." On the panel:

• Dr. Ramesh Jagadeesan, VP & Head – Analytical Solutions, Aragen Life Sciences
• Dr. Jugnu Jain, Co-Founder & CEO, Sapien Biosciences
• Appasaheb Kandagal, CEO, Smilax Laboratories Limited
• Venkat Kamalakar Bundla, CEO, Garphi Biosciences Private Limited

The panel brings together perspectives from contract research, biobanking, manufacturing, and biosciences, with each sector navigating many of the same industry pressures, including evolving compliance requirements, rising R&D costs, and the growing role of AI.

analytica Lab India 2026

India's laboratory technology sector has been evolving over several years, supported by expanding pharmaceutical manufacturing capacity, increased R&D activity, and increasingly stringent quality and compliance requirements. Add AI and automation to that mix, and laboratories are navigating a rapidly changing operating environment. CMI's report and panel discussions aim to bring greater market context and perspective to these developments.

Outside the two sessions, CMI will maintain a presence at Hall 4, Booth B75, throughout the three-day exhibition. Attendees interested in exploring the report's findings or discussing developments shaping the laboratory technology market can connect with the CMI team at the booth.
