

CB Insights Makes Private Company Datasets Available Through Nasdaq Data Link™

NEW YORK, NY, UNITED STATES, September 9, 2026 /EINPresswire.com/ -- CB Insights today announced that three of its private company datasets are now available through [Nasdaq Data Link](#). The offering expands access to CB Insights data through API and data feed delivery, with Nasdaq serving as the exclusive re-distributor to the financial industry.

"Private markets have reached an inflection point. Over \$800 billion dollars poured into private markets over the last 12 months, up 97% from the previous year," said Karl Kong, CEO of CB Insights. "Whether taking a direct position or evaluating a manager's portfolio, institutional investors must exercise judgment about companies with notoriously little information. Our intelligence, honed from nearly two decades of evaluating private companies, shrinks that gap."

The datasets available through Nasdaq Data Link are:

- All Global Funded Companies
- All U.S. Funded Private Companies
- Top 500 Global Private Companies

The three datasets span firmographics, financials, funding, cap table history, investors, partners, customers, founders, operators and board members, and are enriched with CB Insights' analyst-driven market mapping and proprietary Mosaic Score signals used to compare and rank companies. Coverage includes equity funding deals in the U.S. and globally from 2010 to present.

"As private markets grow more complex and more central to how investors build portfolios, the need for reliable data has never been greater," said Brandon Tepper, SVP, Global Head of Data at Nasdaq. "Adding CB Insights to Nasdaq Data Link gives our clients another trusted source for

CB Insights employees in front of Nasdaq Tower, New York City

private markets data, delivered the way they already consume it."

For more information, visit CB Insights datasets on Nasdaq Data Link at <http://www.nasdaq.com/products/data/data-link>.

About CB Insights

CB Insights is the authority on private technology companies. The world's top companies and investors rely on our intelligence to find their next investment, acquisition, partner, or customer. Our dataset is fortified with expert analyst judgment, proprietary operator interviews, and early signals of strategic intent that equip leaders and their AI agents with the clarity to act.
