

Lounge Lizard Launches Custom Drone Website for Heven AeroTech

NEW YORK, NY, UNITED STATES, September 10, 2026 / EINPresswire.com/ -- [Lounge Lizard Worldwide Inc.](#), an award-winning digital agency specializing in brand strategy, [web design](#), and [web development](#), has launched a redesigned website for Heven AeroTech, an innovator in hydrogen-powered unmanned aerial systems (UAS).

The new website transforms Heven AeroTech's advanced aerospace technology into an immersive digital experience that communicates the company's engineering capabilities, product innovation, and mission with greater clarity and visual impact. Through custom web design, web development, and interactive digital experiences, Lounge Lizard created a website that reflects the sophistication of Heven AeroTech's technology and brand.

Heven AeroTech develops advanced autonomous drone platforms engineered for demanding defense, intelligence, surveillance, and national security applications. To better align the company's digital presence with the sophistication of its technology, Lounge Lizard delivered a

Lounge Lizard launches a custom digital experience for Heven AeroTech, bringing its hydrogen-powered drone technology to life online.

comprehensive website redesign featuring custom WordPress development, interactive user experiences, refined information architecture, responsive web design, and real-time 3D aircraft visualization.

“Heven AeroTech operates in an industry where engineering capability, precision, and credibility are central to every interaction,” said Ken Braun, Co-Founder of Lounge Lizard. “Our goal was to create a digital experience that placed their hydrogen-powered drone technology at the center of the story. Through interactive 3D models, strategic UX, and highly optimized web development, we were able to showcase the aircraft in a visually compelling way while maintaining the performance expected from a modern website.”

A central challenge of the project was balancing rich, high-fidelity 3D experiences with website performance. Lounge Lizard addressed this through a collaborative web design and development process in which both disciplines progressed simultaneously. This approach enabled the team to continuously optimize asset compression, page behavior, responsive design, and 3D rendering throughout development.

The result is a high-performance website that allows visitors to explore detailed aircraft models and technical capabilities while maintaining smooth functionality and a consistent user experience across desktop and mobile devices.

The redesigned website strengthens Heven AeroTech’s digital presence while providing a scalable foundation to support the company’s continued growth.

The project also showcases Lounge Lizard’s expertise in custom web design, responsive web design, WordPress web development, and custom website development for organizations that need sophisticated, high-performance digital experiences.
