

Brainfuse Selected for Fulton County Schools' Tutoring Provider Pool

Virtual high-dosage tutoring offers focused ELA and mathematics support tied directly to classroom instruction

NEW YORK, NY, UNITED STATES,
September 9, 2026 /EINPresswire.com/
-- Fulton County Schools has selected

[Brainfuse](#) for its pre-approved tutoring provider pool. Elementary, middle, and high schools across the district can now partner with Brainfuse for virtual high-dosage small-group tutoring in English language arts and mathematics.

“

Students should not feel as though they are moving between two unrelated programs. Tutoring should reinforce classroom learning while addressing the skills getting in their way.”

*Nakeia Jones, K-12
Partnerships Manager*

Fulton County Schools stretches more than 70 miles from Chattahoochee Hills to Johns Creek, with schools managing different schedules, staffing resources, and student needs. Virtual tutoring gives schools a way to schedule recurring sessions without depending only on tutors who can travel to their campus. Students can participate from school while still working live with an experienced subject-area tutor.

“Fulton County’s emphasis on connecting tutoring to classroom instruction is important,” said Nakeia Jones, K-12 Partnerships Manager at Brainfuse and a former

Baltimore City Public Schools educator. “Students should not feel as though they are moving between two unrelated programs. When tutors can use the same standards, student work, and assessment information as the school, each session can reinforce what students are learning while addressing the skills getting in their way.”

Under the Fulton County Schools model, tutoring groups include no more than four students, and each student receives at least 90 minutes of support per week. Brainfuse programs can typically be organized into three or more sessions each week over a sustained tutoring cycle. Students are grouped according to their skills and instructional needs and work with a consistent tutor or tutoring team.

Instruction aligns with the Georgia Standards of Excellence and reinforces Tier 1 classroom learning while providing targeted Tier 2 support for students who need additional intervention. Tutors can use assessment results, student work, teacher input, and district priorities to identify where students need support. ELA tutoring can incorporate evidence-based reading and writing strategies, while mathematics instruction emphasizes conceptual understanding, fluency, reasoning, and problem-solving.

In the Brainfuse online classroom, students can upload assignments, write or draw on an interactive whiteboard, and communicate with their tutor through chat, audio, or video. These options allow students to participate in the way that works best for them. Session archives also let students return to previous explanations and review completed work.

Teachers and administrators can monitor attendance, tutoring activity, skills addressed, tutor notes, assessment performance, and student progress through secure dashboards and downloadable reports. Brainfuse also works with participating schools on student grouping, scheduling, platform access, staff communication, and program monitoring.

About Brainfuse

For more than 25 years, Brainfuse has provided online tutoring, writing support, skills development, test preparation, and other educational services to schools, colleges, libraries, and workforce organizations throughout North America. Brainfuse has served Georgia learners through partnerships with K-12 schools, public libraries, colleges, and universities.

All Brainfuse K-12 tutors are based in the United States, hold at least a four-year college degree, have prior teaching or tutoring experience, and complete proficiency testing, training, and background checks. Brainfuse works exclusively with institutional partners and connects learners with qualified tutors through an accessible online platform.
