

ScribeEMR Announces Rebranding as Nivaran™ the Human-in-the-Loop Healthcare Workflow Company

BOSTON, MA, UNITED STATES, September 9, 2026 /EINPresswire.com/ -- September 9, 2026 — Nivaran™, the new brand name being announced today for ScribeEMR, reflects the company's core mission and expansion as a human-in-the-loop healthcare workflow company that connects

clinical documentation, coding, revenue cycle management, and virtual operations so healthcare organizations can move from chart to claim with one accountable partner.

Nivaran is a Sanskrit-derived word conveying relief from burdens, resolution of problems, and removal of obstacles.

"Nivaran reflects the focus on everything we do -- helping healthcare organizations remove administrative complexity, resolve workflow challenges, and brings relief to providers and staff," says Terry Ciesla, Senior Vice President of Nivaran. "Our new brand and logo encompasses the full range of healthcare support solutions designed to help providers, hospitals, health systems and community healthcare organizations workflows, maximize efficiency and provide better care as a result."

Nivaran's offerings combine AI-enabled technology with trained clinical and administrative professionals, giving healthcare teams flexible support that can scale across specialties, EMRs and operational needs.

Medical Scribing:

Nivaran provides HIPPA Compliant flexible documentation support through fully AI-powered scribing, AI-plus-human review and dedicated live remote scribes that reduce after hours charting time and increase revenue and quality of care. The company's ScribeRyte AI captures encounters and generates clinical notes for provider review; ScribeRyte AI Plus adds professional scribe oversight to refine AI-generated notes. Amplif.AI brings trained human review to notes produced by other AI documentation platforms, and live medical scribing gives providers real-time documentation support during patient encounters.

Revenue Cycle Management:

ScribeEMR supports the financial side of care with claims management, denial and appeal management, and payment posting and reconciliation services. These solutions are designed to help organizations keep claims moving, address payer issues more efficiently, identify recurring denial patterns and maintain clearer visibility into payment status.

Medical Coding:

Nivaran's medical coding services help healthcare organizations turn strong documentation into cleaner claims. Facility coding supports complex facility-based encounters, professional fee coding helps accurately reflect provider-level care, risk adjustment coding supports complete diagnosis capture, and medical coding audits identify documentation gaps, coding patterns and compliance risks.

Virtual Medical Office Services:

ScribeEMR also helps practices manage front-office and patient communication workflows, including referral management, chart preparation, fax management, prior authorization support, call support, patient registration, appointment confirmation and patient outreach.

Medical Center Call Support

Nivaran's medical call center support teams streamline patient registration, appointment confirmation and outreach workflows so practices can keep communication moving without overburdening front-office staff and focus on care. Trained specialists verify patient information, confirm upcoming visits, support reminder campaigns, route messages and follow up on routine communication needs.

"Healthcare organizations need flexible partners who can support both clinical and administrative work," Ciesla says. "Our goal is to be the single, accountable partner that help providers spend less time on documentation and back-office tasks while maintaining accurate, efficient workflows that support patient care."

About Nivaran

Nivaran, formerly ScribeEMR, is the human-in-the-loop healthcare workflow company that connects clinical documentation, coding, revenue cycle management, and virtual operations so healthcare organizations can move from chart to claim with one accountable partner. Its ScribeRyte AI platform delivers fast, highly accurate, HIPAA-compliant clinical documentation and supports workflows across leading EMRs, including eClinicalWorks, Epic, Athenahealth, NextGen, Greenway, and others. The company was ranked Best in KLAS for Virtual Scribing Services in the 2024, 2025 and 2026, Best in KLAS: Software & Services Reports and was rated highly in a KLAS First Look report for its ScribeRyte AI platform.
