

Nulogy Appoints Anurag Garg as Chief Product Officer to Advance Connected Food and Beverage Operations

Garg brings deep manufacturing and quality software experience to help Nulogy connect the people, processes, and partners behind every product.

TORONTO, ONTARIO, CANADA, September 10, 2026 / EINPresswire.com/ -- [Nulogy](#), a leading provider of manufacturing and supply chain operations software, today announced the appointment of Anurag Garg as Chief Product Officer.

The appointment follows the launch of the Nulogy Manufacturing Operating System earlier this year.

Manufacturers, co-packers, and contract packagers across CPG, food and beverage, and industrial sectors face the same pressure: prove quality and compliance, respond faster to change, and coordinate work across external partners without compromising the bottom line.

“

Manufacturers are being asked to move faster without compromising quality, compliance, or resilience.”

Bill Ryan, CEO, Nulogy

As Chief Product Officer, Garg will lead Nulogy's product strategy and roadmap, working closely with customers and teams across the company to build a more connected experience across production, quality, food safety, traceability, and supplier operations. He will also guide how Nulogy applies AI to reduce repetitive work, improve decision-making, and make technology easier for frontline teams to use.

Nulogy

"Manufacturers are being asked to move faster without compromising quality, compliance, or

resilience," said Bill Ryan, CEO of Nulogy. "Anurag has spent his career turning complex plant-floor problems into products that are practical, scalable, and easy to adopt. Under his leadership, we will continue advancing meaningful innovation for the people and businesses that make and package products."

Garg brings more than a decade of experience building and scaling industrial technology and enterprise software businesses. He previously served as Chief Product Officer at SafetyChain Software, where he led a portfolio of quality management products used in food & beverage production plants. Before that, as Vice President of Product Management and Strategy at Plex Systems, a Rockwell Automation company, he oversaw a portfolio spanning platform capabilities, manufacturing analytics, industrial IoT, and user experience. Earlier he co-founded the Industrial-IoT startup DATTUS (acquired by Plex) and was named to Forbes 30 under 30. Anurag holds BS/MS degrees in Electrical Engineering from Purdue University.

"Nulogy has strong products, deep industry knowledge, and meaningful customer loyalty," said Garg. "What attracted me is the opportunity to build on that foundation in an industry that touches everyone. The products people put in their shopping carts every week are made and packaged by a network of manufacturers, co-packers, and brands working together. I look forward to working with customers and teams across Nulogy to create a more connected ecosystem and apply AI in ways that make work easier, decisions faster, and operations safer and more resilient."

About Nulogy

Nulogy is for the people behind every product. Nulogy makes the software that food and beverage companies run their operations on, helping manufacturers, co-packers, brands, distributors, and retailers manage production, quality, food safety, and traceability in one connected system. Its purpose-built platform turns that everyday work into proven results: less waste, faster recall response, and the records to prove compliance on demand.
