

Bradley Gross Named Strategic Advisor to Kipling Secure

Prominent MSP attorney brings 27 years of experience to help shape Kipling's AI governance capabilities

WESTON, FL, UNITED STATES, September 10, 2026 /EINPresswire.com/ -- [Bradley Gross](#), one of the most well-known attorneys in the managed services industry, today announced his appointment as Strategic Advisor to [Kipling Secure](#), an AI Detection and Response platform built for managed service providers.

Having counseled thousands of MSPs, Gross brings extensive experience with the legal and business challenges facing technology service providers. He will advise Kipling Secure on the evolving legal landscape surrounding AI governance, including policy best practices, statutory and regulatory developments, and emerging case law. His perspective will help shape capabilities that support MSPs in establishing governance policies, clarifying responsibilities, and addressing AI risks across customer environments

"MSPs are increasingly expected to help customers make decisions about AI use, sensitive information, and accountability," said Gross. "Those decisions carry legal implications that need to inform both the technology and the policies governing its use. My goal is to help Kipling Secure connect those requirements to the realities MSPs and their customers face every day."

Saurabh Sandhir, CEO of Kipling Secure, added that "MSPs need practical ways to understand how customers are using AI and put clear policies around that use. Brad understands the responsibilities and business realities that MSPs navigate every day. His perspective will help us build governance capabilities that reflect those realities and support services MSPs can deliver to their customers."

About Kipling Secure

Kipling Secure provides an AI Detection and Response platform built for managed service providers. The platform helps MSPs discover AI usage across customer environments, identify unauthorized AI tools, enforce policies, and protect sensitive data. By combining visibility, governance, and reporting, Kipling Secure enables MSPs to help clients manage AI risk while building recurring revenue through managed AI security services.
