

Splan, Inc. Joins Gallagher Security's Endorsed Technology Partner Program

Splan Delivers Enterprise Visitor Management and PIAM Integration with Command Centre V9.3 and above

ATLANTA, GA, UNITED STATES, September 14, 2026 / EINPresswire.com/ -- Splan, Inc. a leading provider of AI-powered Physical Identity Platform that includes Physical Identity and Access Management ([PIAM](#)), and Enterprise Visitor Management, announced at the Global Security Exchange Conference (GSX) that it has been approved and accepted into the [Gallagher Security Endorsed Technology Partner Program](#).

Gallagher Logo

Splan logo

Splan has integrated its Physical Identity Platform with Gallagher Command Centre, enabling organizations to extend identity governance and physical access management across employees, contractors, visitors, vendors, and other identities. Through integrations with PACS and enterprise IAM systems, Splan enables organizations to connect digital identity processes with physical security operations while improving security, operational efficiency, and user experience.

Physical Identity Governance is essential to address security vulnerabilities in critical infrastructure and regulated industries. Splan brings physical identity governance to Gallagher customers.””
Madhu Gourineni, CEO, Splan

Splan has integrated its AI-powered Physical Identity Platform with Gallagher Command Centre with the ability to deliver comprehensive Enterprise Visitor Management and PIAM (Physical Identity and Access Management), Mobile Credentials and Security Insights. Built for the modern cloud, Splan's Visitor Management solution ensures smooth and simplified touchless check-ins for visitors, employees, contractors, vendors, and more.

Splan's PIAM offers seamless integration with all brands of PACS, as well as IAM Systems.

Powerful workflow automation streamlines operations for employee onboarding, access change requests, and even contractor and vendor management. With mobile wallet credentials and the industry's broadest access-control integrations, Splan helps enterprises modernize physical identity while improving security, efficiency, and user experience.

Gallagher Command Centre is designed to seamlessly integrate with a wide range of systems and hardware, creating a single operating platform to manage total site security, including alarm, access, and perimeter security in one single solution.

According to Blake Smith, National Technical Manager for Gallagher Security - Americas, "Command Centre V9 is packed with new features and allows users to manage their business with greater efficiency and flexibility. The integration with Splan's Physical Identity Platform allows the benefits of true physical identity governance across employees, contractors, visitors and vendors".

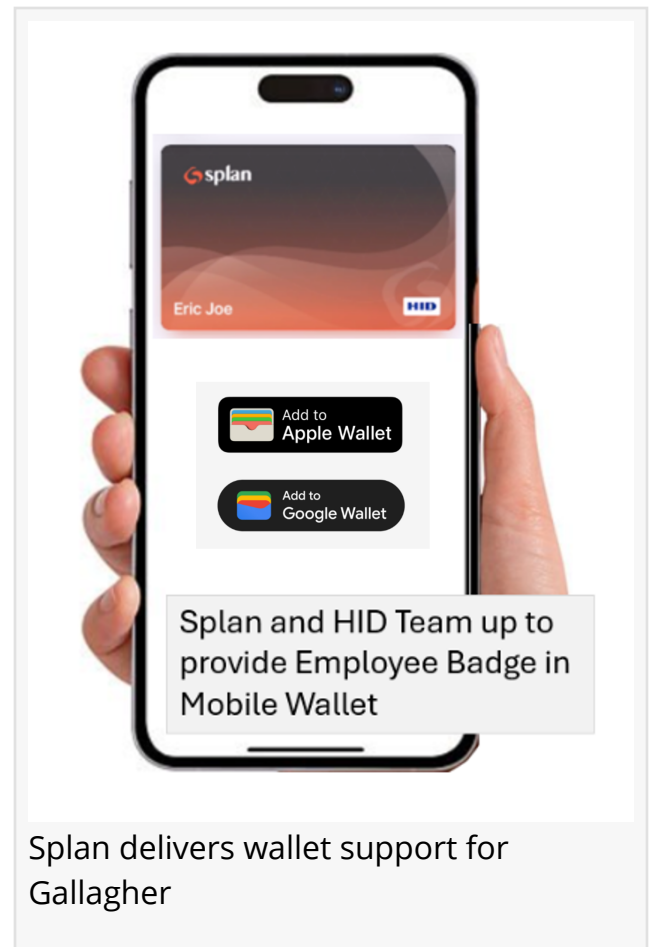

Command Centre is Gallagher's award-winning, scalable site management software, unifying alarm, access, and perimeter security on one single platform. Known for its extensive set of features, it remains one of the most advanced site management solutions available.

According to Madhu Gourineni, Founder & CEO of Splan, "Physical Identity Governance has become a must-have to address security vulnerabilities in critical infrastructure and regulated industries. As identity has become the number one risk, the complete identity lifecycle from hire-to-retire must be secured across the organization." He goes on to add, "Our partnership with Gallagher allows us to open an unprecedented path to bring physical identity governance to Gallagher customers."

ENDS

About Splan

Splan offers an AI-powered Physical Identity Platform that includes Physical Identity and Access Management (PIAM), and Enterprise Visitor Management with Security Insights. Splan helps organizations streamline physical access for employees, contractors, visitors, and vendors through workflow automation and integrations with physical access control and enterprise

identity systems. By connecting IT identity processes with physical security operations, Splan enables organizations to improve governance, security, operational efficiency, and user experience.
