SK Security Marks 10 Years With 5,000 Five-Star Reviews

The Kansas City-based security firm has grown to seven states and 400 employees, earning recognition as the fastest growing security guard company in the Midwes

KANSAS CITY, MO, UNITED STATES, September 11, 2026 /EINPresswire.com/ -- SK Security, a provider of armed guards in Kansas City and across seven states, is marking a major milestone: 10 years in business, more than 5,000 five-star reviews, and recognition as the fastest growing security guard company in the Midwest. Founded in 2017 by Sidney Kile with one officer and one neighborhood contract, the company has grown into a multimillion-dollar operation with 400 employees, over $25 million in sales, and active operations in Kansas, Missouri, Nevada, Montana, Nebraska, Arizona, and Texas.

> Safety with a Smile is SK Security's slogan that we stand by, as we pride ourselves in de-escalation tactics to provide safe, worry-free results for our clients,"
>
> *SK Security*

The growth reflects both the demand for professional security services and the approach SK Security has taken since its first day of operation. The company built its reputation by delivering consistent, professional service to property managers, apartment complexes, hotels, business complexes, business owners, and retail stores. These are clients who need dependable security coverage and clear communication, and SK Security has structured its entire operation around meeting those needs reliably.

SK Security has been voted the best security guard company in Kansas City five years in a row. That recognition is backed by a service model that centers on de-escalation, professionalism, and 24/7 availability. Officers are trained to communicate first and to prioritize peaceful resolution while remaining fully prepared to act when a situation demands a stronger response. This balance between approachability and readiness is the core of how the company operates, summed up in its long-standing motto: Safety with a Smile.

The company offers three primary service lines: armed guards, unarmed guards, and roving patrol services. Armed security officers are deployed where clients face elevated risk, such as high-value commercial properties, large retail locations, and environments where a visible deterrent is essential. Unarmed officers serve residential communities, office buildings, hotels, and other locations where professional presence and strong communication skills are the priority. Roving patrol services give clients regular, scheduled mobile coverage across a property

or set of properties, creating consistent visibility without the cost of stationary posts at every location.

SK Security holds the largest patrol fleet in all of Kansas City and the largest patrol fleet in all of Montana. In Nevada, the company has been recognized as the largest growth company in Las Vegas. These distinctions reflect the investment SK Security has made in physical infrastructure, including vehicles, equipment, and personnel, to support clients across multiple states. A large fleet means faster response times, more flexible scheduling, and the ability to serve clients whose needs change from week to week.

The range of clients SK Security serves speaks to how broadly professional security is needed. Apartment complex managers need officers who can handle tenant disputes calmly and document incidents accurately. Hotel operators need staff who can manage access, respond to disturbances, and represent the property professionally to guests. Business owners need coverage that deters theft and keeps employees and customers safe without creating an atmosphere of tension. SK Security trains its officers to understand each of these environments and to adapt their approach accordingly.

Security services are also customized for construction sites, events, and other high-risk or time-sensitive situations. Mobile patrol can be structured around a client's specific schedule, with officers making rounds at set intervals or responding to alerts as needed. The company's 24/7 operations mean that clients have coverage and support available around the clock.

"Safety with a Smile is SK Security's slogan that we stand by, as we pride ourselves in de-escalation tactics to provide safe, worry-free results for our clients," said Sid of SK Security.

That philosophy has driven the company's growth from a single contract in Kansas City to a seven-state operation serving commercial and residential environments across the country. What began as a straightforward commitment to keeping people safe has expanded into a full-service security company with the personnel, equipment, and operational depth to handle complex, ongoing client needs.

SK Security's presence across multiple states also means that businesses with locations in several territories can work with a single provider rather than managing relationships with several vendors. That consistency matters to property management companies and retail operators who need standardized training, reporting, and communication across all of their sites.

The company's track record, expanding fleet size, and consistently high client ratings reflect what clients have found: a security company that shows up on time, communicates clearly, and handles difficult situations with professionalism. The five-year run as the voted best security company in Kansas City and the recognition across multiple states underscore that reputation in the market.

About SK Security
