Webpuppies Named an OpenAI Select Partner

Webpuppies, a Singapore-headquartered digital transformation consultancy, today announced that it has been named an OpenAI Select Partner.

Webpuppies Is Now an OpenAI Select Partner. Here Is What It Changes for Clients.

SINGAPORE, SINGAPORE, SINGAPORE, September 15, 2026 / EINPresswire.com/ -- Webpuppies, a Singapore-headquartered digital transformation consultancy specialising in AI, cloud, data and cybersecurity, today announced that it has been named an OpenAI Select Partner within the OpenAI Partner Network.

The OpenAI Partner Network is a global program for partners to build, sell, and deliver AI solutions with OpenAI. It brings together partners with deep industry expertise, delivery capabilities, and customer relationships while equipping them with resources, enablement, and support to help enterprises adopt OpenAI frontier models and products and turn them into measurable impact.

> “Working with OpenAI, we can take GPT beyond the pilot and into the daily workflows of banks, government agencies and enterprises across the region, with governance and measurable outcomes built in.”

As an OpenAI Select Partner, Webpuppies will continue working with OpenAI to help organizations build, deploy, and scale AI solutions responsibly and effectively. This work will help organizations get more useful work from every token and stronger performance per dollar with GPT□5.6, while using ChatGPT Work to turn ambitious goals into finished work.

Webpuppies brings more than 25 years of enterprise delivery experience across Asia Pacific, with capabilities spanning agentic AI development, document and knowledge intelligence, Codex-driven engineering enablement, and governed deployment across the OpenAI API platform, ChatGPT Enterprise and Azure OpenAI Service.

“Being named an OpenAI Select Partner recognises something our clients already see in delivery: the hard part of enterprise AI is no longer the model, it is putting the model to work safely inside real operations. Working with OpenAI, we can take GPT beyond the pilot and into the daily workflows of banks, government agencies and enterprises across the region, with governance and measurable outcomes built in from day one,” said Abhii Dabas, Chief Executive Officer, Webpuppies.

Abhii Dabas, Webpuppies Managing Director

Webpuppies supports organizations across financial services, healthcare, government and the public sector, real estate and manufacturing in Singapore and Asia Pacific with AI consultancy, agentic system development, data engineering, cloud and cybersecurity services. Its work includes enterprise deployments for organisations such as NETS, Visa, Abbott, A*STAR and Singapore’s Ministry of Education, and it is a member of the AI Verify Foundation, embedding responsible AI practices into every engagement.

Looking ahead, Webpuppies plans to expand its OpenAI-related offerings across agentic automation, document intelligence and developer velocity, invest in engineer enablement on GPT and Codex, and scale governed customer deployments across the region, helping customers translate AI ambition into business outcomes.
