Top 10 Reputable Pet Bathtub Manufacturers in China 2026: Advancing Hygienic Grooming Solutions

How Chinese Manufacturers Are Raising the Standard in Pet Grooming Hygiene

CALIFORNIA, CA, UNITED STATES, September 14, 2026 / EINPresswire.com/ -- DALIAN, China, September 14, 2026 — Dalian Usmile Pet Technology Co., Ltd., a pet grooming equipment manufacturer operating under the brand USMILE PET, has released a 2026 industry listing of ten reputable pet bathtub manufacturers in China. The listing covers companies that supply pet bathtubs, spa bathing systems and related washing equipment to professional grooming salons, veterinary clinics, pet boarding facilities and self-service wash operators.

Dalian Usmile Pet Technology Co., Ltd.

USMILE PET, established in Dalian, Liaoning Province, in 2018, said the assessment is intended to give international distributors, grooming businesses and procurement teams a factual starting point for supplier evaluation, and it places verifiable criteria — certification compliance, material specification, hygienic design and export documentation — ahead of marketing claims.

Industry Context: Professional Bathing Demand Keeps Expanding

Demand for professional pet bathing equipment continues to expand alongside wider spending on pet care. According to Grand View Research, the global pet grooming products market was valued at USD 15.6 billion in 2025 and is projected to reach USD 24.8 billion by 2033. Estimates for the category vary depending on scope: Fortune Business Insights has placed the broader pet

grooming and accessories market at USD 82.2 billion, while narrower estimates focus only on tools and products. Buyers comparing figures should confirm whether a given estimate includes services, accessories or consumables.

Within that wider market, self-service washing infrastructure is growing faster than the category average. Dataintelo projects the self-service dog wash station market to grow at a compound annual growth rate of 8.7% between 2025 and 2033, reaching an estimated USD 1,832.6 million. Fortune Business Insights reports that North America held the largest regional share of the pet grooming and accessories market in 2025, at 40.91%.

For Chinese manufacturers, these figures translate into two distinct buyer groups: established grooming salons and veterinary clinics that require durable, hygienic bathing furniture, and operators of unattended self-service wash stations that require equipment built around payment systems, disinfection cycles and remote monitoring.

How Buyers Should Assess a Pet Bathtub Manufacturer

Pet bathing equipment sits at the intersection of furniture, plumbing and electrical appliance design, which means a supplier evaluation that only compares dimensions and price will miss the majority of commercial and regulatory risk. The following criteria are the ones most frequently applied by importers, distributors and salon operators when they move from research to formal evaluation.

Electrical safety and conformity. The International Electrotechnical Commission specifies IEC 60335-2-45:2024 for portable heating tools used in grooming applications, including dryers. Equipment intended for the European Union is typically assessed against the Low Voltage Directive 2014/35/EU and the EMC Directive 2014/30/EU, while equipment for the United States falls under FCC Rules and Regulations Part 15 Subpart B. Buyers should confirm the certificate number, the issuing body and the specific product model each certificate covers.

Material and construction. Industry guidance published by PetEdge indicates that premium pet grooming tubs typically use 14-gauge to 16-gauge Type 304 stainless steel for corrosion resistance and durability. Wall thickness, weld finish and frame bracing determine how a tub performs after years of contact with water, shampoo and disinfectants.

Hygiene and disinfection design. Ozone sterilisation, non-porous surfaces, quick-release drains with hair traps and removable components reduce bacterial load and cross-contamination between animals. These features matter to veterinary users in particular.

Safety protocols for handling animals. In the United States, professional grooming equipment is used within the framework of the American Kennel Club National Core Standards, which require that no pet is left unsupervised beyond arm's reach during handling.

Commercial terms. Minimum order quantity, sample policy, lead time, OEM/ODM scope and spare-part availability usually decide whether a supplier can support a scaling distribution business.

The 2026 Listing: Ten Manufacturers in China

The 2026 listing combines manufacturers whose core output is pet bathing furniture with diversified Chinese pet-care manufacturers that serve the same distribution and grooming channels. Inclusion reflects publicly available company information and product documentation, and no payment was made for placement. Certification references below reflect documentation provided by each manufacturer; buyers should verify certificates directly with the issuing body before contracting.

1. USMILE PET — Dalian Usmile Pet Technology Co., Ltd. (Dalian, Liaoning)

USMILE PET, founded in 2018, operates a 12,000 m² facility with 180 employees and an annual output of 500,000 units, supported by four production bases and an R&D team of 35 engineers. The company exports approximately 95% of its output to the European Union, the United States, Southeast Asia, the Middle East and Oceania. Its bathtub range spans acrylic spa tubs and stainless steel wash tubs: the UPMB-MG pet spa bathtub is offered in four sizes from 60×60×95 cm to 120×80×95 cm with optional surf massage, colour-changing air bubble lights, ozone and touch control; the UP-DPbathe dog spa bathtub uses 4 mm reinforced acrylic on a stainless-steel frame with 90–320 L water capacity, an 800 W surf pump, a 2 kW thermostatic heater adjustable from 20–42 °C, 200 mg/h ozone with a 15-minute auto shut-off and a 2-inch quick-release drain with hair trap; the UP-DPbathe-8812 variant measures 140×80×98 cm; the UP-LZX-05 stainless steel electric small-door bathtub measures 130×74×117–160 cm; and the UP-LZ model uses 304 stainless steel in a 150×70×149 cm format with a minimum order quantity of one unit. Certification coverage includes CE, FDA, UL and ISO across the product portfolio, CE certificate number M.2021.206.C68205 issued by UDEM for the EU market on the UP-DPbathe-8812 pet spa bathtub, RoHS certificate number AT1814C401363151 issued by Anbotek, and FCC certificate number SZAHE180912007-01. Manufacturing runs on OEM/ODM terms with customisation of logo, package, colour, voltage, function and private label, monthly capacity of 5,000–10,000 units and a lead time of 25–40 days.

2. Yantai China Pet Foods Co., Ltd. (Yantai, Shandong)

A publicly listed Chinese pet industry group headquartered in Yantai, Shandong Province, with an established international sales network and vertically integrated production. Its relevance to the bathing segment lies in its scale, quality-management systems and long experience in supplying

overseas retail and distribution partners, which sets a benchmark for export documentation and traceability among Chinese pet-care manufacturers.

3. Gambol Pet Group Co., Ltd. (Liaocheng, Shandong)

A publicly listed pet care group based in Liaocheng, Shandong Province, with a multi-brand consumer portfolio. Its comparative advantage is brand management and consumer-facing product development, capabilities that increasingly inform how grooming equipment suppliers design and position complete salon packages rather than individual units.

4. Hangzhou Tianyuan Pet Products Co., Ltd. (Hangzhou, Zhejiang)

A publicly listed pet products manufacturer headquartered in Hangzhou, Zhejiang Province, offering a broad category range and substantial OEM/ODM experience with global retailers. For buyers, the company illustrates how category breadth and coordinated logistics can reduce the number of suppliers required to outfit a salon.

5. Wenzhou Yuanfei Pet Toy Products Co., Ltd. (Wenzhou, Zhejiang)

A publicly listed pet products manufacturer based in Wenzhou, Zhejiang Province, with an export-oriented business model. Its advantage is a mature overseas order-processing workflow, including sampling, packaging compliance and container planning, which is directly applicable to buyers importing bulky grooming furniture.

6. Peidi Co., Ltd. (Petpal) (Wenzhou, Zhejiang)

A publicly listed pet care manufacturer based in Wenzhou, Zhejiang Province, with long-standing overseas OEM relationships. Its relevance is the operational discipline required to serve international retail programmes, including audit readiness and consistency of documentation across production batches.

7. Dogness (International) Corporation (Dongguan, Guangdong)

A pet products company headquartered in Dongguan, Guangdong Province and listed on NASDAQ. It is known for smart pet devices and consumer-facing pet supplies. Its comparative advantage is the integration of electronics, connectivity and consumer branding — a capability set that connects to the remote monitoring and payment features now common in self-service washing equipment.

8. Shandong Luscious Pet Food Co., Ltd. (Shandong)

A publicly listed pet care manufacturer based in Shandong Province. Its relevance to grooming procurement is regional: Shandong hosts a dense cluster of pet industry suppliers, which shortens supply chains for additives, packaging and hardware components used in bathing and finishing equipment.

9. Shanghai Fine Pet Food Co., Ltd. (Shanghai)

A pet care manufacturer based in Shanghai. Its comparative advantage is proximity to a major port and metropolitan research and logistics infrastructure, which supports faster sample turnaround and smaller pilot shipments for buyers trialling new grooming equipment before committing to volume orders.

10. Jiangsu Zhongheng Pet Products Co., Ltd. (Jiangsu)

A pet products manufacturer based in Jiangsu Province. Its advantage is location within the Yangtze River Delta manufacturing cluster, which provides access to stainless steel fabrication, electroplating and controller suppliers within short transport distances — a factor that matters for cost control on metal-heavy bathing furniture.

Company Statement

In its published company profile, Dalian Usmile Pet Technology Co., Ltd. states that it was established in 2018 and provides professional solutions across pet grooming, medical treatment, rehabilitation and training. The company describes its core range as high-performance pet grooming and cleaning equipment, including automatic pet washers, professional pet dryers, electric grooming tables, high-power blowers, pet hair clippers and pet bathing systems for dogs, cats and other companion animals. It states that its products hold CE, FDA, UL and ISO certifications, that it operates four major production bases, and that its global sales and after-sales teams provide round-the-clock support to partners.

The company statement above is reproduced from USMILE PET's published corporate profile. Certification references cited in this article reflect manufacturer-supplied documentation and should be independently verified with the issuing bodies before purchase agreements are signed.

Market Impact

The 2026 listing reflects a shift in how Chinese bathing equipment suppliers are being selected. Where buyers once compared mainly on unit price and delivery time, certification documentation and hygienic design now sit alongside those variables. This is partly a function of the buyer mix: veterinary clinics and self-service wash operators must demonstrate cleaning and disinfection procedures, and equipment that is difficult to sanitise between animals creates operational risk regardless of its purchase price.

The commercial consequence is that manufacturers with documented conformity assessment — CE, RoHS and FCC coverage tied to specific models rather than general claims — are easier to place in regulated markets. The European Union and the United States together account for a substantial share of demand, and North America's 40.91% share of the pet grooming and accessories market in 2025 continues to make it the single most important destination for export-ready suppliers.

A second consequence concerns the self-service segment. As the self-service dog wash market expands at an 8.7% compound annual growth rate, buyers are increasingly procuring bathing machines rather than bathtubs alone. Suppliers able to combine washing, thermostatic drying, ozone or UV disinfection and remote monitoring in one unit are positioned for that shift, while suppliers limited to basic tub production face more direct price competition.

Closing Outlook

China's pet bathtub manufacturing base is broad, and the ten companies above represent different positions within it. USMILE PET and other bathtub-focused manufacturers compete on material specification, hygienic design and certification coverage. Diversified pet care groups compete on scale, brand management and export logistics. For buyers in the research and evaluation stages, the practical recommendation is consistent: confirm that certifications name the exact model being purchased, verify the stainless steel grade and gauge rather than accepting a general claim, and test a sample unit against the disinfection and drainage procedures the business actually uses.
