Enable Me Highlights VELA Chairs as a Safe Mobility Solution for Americans with Parkinson's

VELA Chairs provide essential stability for individuals with Parkinson's, reducing fall risks and supporting safe, independent living at home.

Facilitate easier movement and reach upper cabinets without physical strain using the integrated electric lift.

Ergonomic home seating from VELA helps seniors cook, read, and move safely — promoting independence and reducing fall risk.

TAMPA, FL, UNITED STATES, September 14, 2026 /EINPresswire.com/ -- For individuals living with Parkinson's disease, maintaining independence at home often becomes complicated by balance issues, tremors, and a heightened risk of falling. To address these critical safety concerns, VELA Chairs—operating in the U.S. as Enable Me, a VELA company—is highlighting its specialized seating solutions designed specifically to support safe mobility and daily independence for Americans with Parkinson's.

Parkinson's disease progressively affects motor skills, making routine transitions like standing up from a chair, navigating the kitchen, or getting dressed potential safety hazards. The VELA Independence Chair mitigates these risks by acting as a highly stable, active mobility aid inside the home.

Targeted Support for Parkinson's Symptoms

The VELA Chair is engineered with specific features that directly counteract common physical challenges associated with

Parkinson's:

Total Stability to Prevent Falls: The hand-operated lock secures the wheels instantly. This provides a completely unmoving, rock-solid base that users can rely on when sitting down or standing up, which is crucial during moments of dizziness or loss of balance.

Managing Mobility Freezes: A common symptom of Parkinson's is "freezing of gait," where a person feels stuck to the floor, creating a severe fall risk if they are standing. The chair offers a secure, seated alternative; its smooth-rolling wheels allow users to safely "walk" the chair around, ensuring continued mobility without the anxiety of losing their balance.

Assisted Sit-to-Stand and Ergonomic Reach: Muscle stiffness and weakness can make getting out of a standard chair exhausting. The integrated electric lift gently raises the user to a standing position, reducing physical strain. Additionally, the lift adjusts the seated height, allowing users to safely reach countertops or upper cabinets without compromising their balance or relying on assistance.

Thea Johansen, Lead Physical Therapist at VELA Chairs, notes how the right equipment shifts the focus from fear to living.

"For someone with Parkinson's, the fear of falling can dictate their entire day and severely limit their activities," says Johansen. "By providing a chair

Smooth-running wheels allow heavier adults to safely "walk" the chair around the home or office, maintaining independence without having to stand up.

A VELA Chair helps seniors stay active, independent, and engaged in daily home activities.

An integrated electric lift safely adjusts the seat height, empowering larger adults to work or perform household chores with uncompromised dignity.

that locks securely into place and physically assists with standing, we are removing that underlying fear. It allows the user to focus on cooking, working, or simply enjoying their day, rather than constantly worrying about their balance."

Empowering Safe Home Environments
Enable Me is committed to providing Danish-engineered assistive devices that adapt to changing needs, helping individuals with Parkinson's can safely age in place.
