The grants will help fund initiatives ranging from breast cancer education and self-advocacy to patient navigation, prevention, early detection and survivorship support, including programs specifically designed to reach rural and underserved communities.

"These organizations are doing extraordinary, life-changing work in communities throughout Florida, often reaching people who might otherwise face breast cancer without the information, support or resources they need," said Karen Patti, Executive Director of the Florida Breast Cancer Foundation. "We are incredibly proud to invest in

organizations that are on the front lines every day, making sure Floridians facing breast cancer are informed, supported and never left to navigate the journey alone."
