

Studio Controls .NET Core Released by BI Technologies Inc.

High Calibre Affordable Office Scheduling Component Software for Windows App Development

WINNIPEG, MANITOBA, CANADA,
September 14, 2026 /

EINPresswire.com/ -- DBI Technologies Inc., the leader in visualising enterprise resource data is pleased to announce the release of [Studio Controls .NET Core](#). A comprehensive suite of UI and UX design custom stylable Office Scheduling, Calendaring, Data

Visualisation and Reporting controls for enterprise .NET Core Windows developers. Studio Controls .NET Core offers Windows developers an enhanced set of high calibre, affordable data visualisation and productivity tools for enterprise data visualisation solutions.

“

We can always count on the performant controls and outstanding customer service from DBI Technologies Inc.,”

BAE Systems

DBI has provided snap-in, Drag and Drop appointment scheduling and Data visualisation component software for thirty years and the release of Studio Controls .NET Core continues the company's market leading position of supplying Windows Developers with a full slate of industry proven component software. "Our customers include a long list of Fortune 500 companies, enterprise and commercial software companies including well-known business consultants who provide industry leading

products that meet the needs of their ERP, MRP, CRM, SCM, Logistics, scheduling and resource planning focused market customers".

The release of Studio Controls .NET Core demonstrates DBI's approach for solving many of the business intelligence software design requirements developers face today. Fundamentally, end users want to have more direct interaction with the data that they are working with - being able to use direct inline editing and customized real-time data visualisation helps increase efficiencies and worker productivity.

The new visual presentation aspects of DBI's component software products offer an unparalleled set of developer focused tools. Studio Controls' new Graphical Data Presentation capabilities and User Drawn resources allow developers to fully extend their own data presentations in less time, with greater accuracy.

Studio Controls incorporates a full collection of data optimized controls well suited for the most demanding of enterprise applications, handling millions of data records. DBI continues to take advantage of the latest Visual Studio developments, offering developers a current selection of UI design, planning and appointment scheduling component software based on advanced development architectures. Studio Controls .NET Core enables development teams with optimized UX design functionality for timely market responses and profitable results.

DBI's industry proven component-based software is found in commercial and enterprise solutions that support healthcare and logistics, manufacturing and assembly line production. Designed to complement and enhance existing investments in enterprise resource management the advanced planning and scheduling solutions offered by DBI's Component Software have been the choice of developers for more than twenty eight years.

Available Now - Studio Controls .NET Core
