

JUNK SHOT Launches Patented AI-Powered Quoting Technology for Residential Customers

JUNK SHOT launches patented AI quoting technology, letting residential customers upload photos and get a local junk removal quote range instantly.

TAMPA, FL, UNITED STATES, September 16, 2026 /EINPresswire.com/ -- [JUNK SHOT](#) has launched a patented AI-powered quoting technology designed to provide residential customers with a preliminary junk removal quote range through the JUNK SHOT App.

The technology allows customers to submit a photo of the items they want removed through the app. The system analyzes the submitted image to estimate the amount of truck space the items may require and uses that information with local pricing data to generate a quote range.

The technology is currently available exclusively to JUNK SHOT's residential customers.

By providing a preliminary quote range digitally, the system is designed to reduce the need for an in-person visit solely for the purpose of preparing an estimate. For JUNK SHOT franchisees, the technology may also reduce unnecessary travel associated with providing preliminary estimates.

"We are proud of what our development team has accomplished," said Fred Tomlin, Jr., CEO and Co-Founder of JUNK SHOT. "When we began pursuing our patent, we envisioned using technology to make the pricing process more efficient and transparent for customers. The launch of AI-powered quoting is an important step in developing that vision."

The technology is part of JUNK SHOT's broader technology platform, which includes its mobile application for residential customers. Through the JUNK SHOT App, customers can submit information about items they need removed, receive pricing information, and request or schedule service.

"We see technology as an important part of how we continue developing the customer

Instant Junk Removal Quote

experience and supporting our franchise network,” said Sherrod Hunter, President, COO, and Co-Founder of JUNK SHOT. “The AI-powered quoting technology is one of several areas we are continuing to develop as our technology platform evolves.”

The AI-powered quoting technology is currently available to JUNK SHOT residential customers. Additional applications and developments are planned as the company continues expanding its technology platform.

About JUNK SHOT

JUNK SHOT is a junk removal company that combines local franchise operations with technology designed to support the customer and service experience. Through the JUNK SHOT App, residential customers can submit photos of items for removal, receive pricing information, and request junk removal services.
