AUSTIN, TX, UNITED STATES, September 15, 2026 / EINPresswire.com/ -- The Texas Nuclear Alliance (TNA) has welcomed PTAG as a member, adding owner-side Project Integrator experience in complex capital delivery to the growing coalition advancing nuclear energy in Texas.

"Nuclear's opportunity in Texas is significant, but delivery will determine the outcome," said TNA President Reed Clay. "PTAG brings owner-side Project Integrator experience focused on managing execution risk and improving certainty across complex capital programs. We are proud to welcome PTAG as a member of the Texas Nuclear Alliance as Texas moves toward building the next generation of nuclear assets."

As nuclear projects advance across small modular reactors, advanced technologies, and large-scale generation, owners must integrate increasingly complex interfaces across technology providers, engineering, contracting, quality, supply chain, construction, and commissioning.

"The challenge facing nuclear is no longer simply technology or demand; it is delivery," said Michael Dubreuil, CEO of PTAG. "The OEM owns the technology and contractors own their scope, but the owner remains accountable for the overall outcome. PTAG works on the owner's side as the Project Integrator, connecting those interfaces from early project strategy through commissioning and power delivery."

About PTAG

PTAG is an owner-side capital projects integrator focused on improving certainty across complex capital programs and major infrastructure projects. PTAG helps owners integrate governance, commercial strategy, project controls, risk, quality, engineering, construction and commissioning across the capital lifecycle.

PTAG supports owners across Power Generation and Transmission, Oil & Gas, Mining & Resources and Heavy Infrastructure, with offices in Houston, Toronto and Calgary. To learn more, visit www.ptaginc.com.

About the Texas Nuclear Alliance

TNA is the only industry association in Texas dedicated to the advancement of nuclear technology in the state. Formed in 2022 in the aftermath of Winter Storm Uri, and comprising of over 80 member entities today, TNA is based on the fundamental premise that if Texas and the world want low-carbon, reliable energy, it can no longer turn its back on nuclear energy. In the 89th Texas Legislature, TNA helped pass four nuclear-dedicated bills, including House Bill 14, a $350 million investment by the state in nuclear energy—the largest of its kind in the U.S—that led to the creation of the Texas Advanced Nuclear Energy Office (TANEO). TNA was formed with a singular mission: to make Texas the Nuclear Capital of the World. Nuclear is clean, safe, reliable, and secure.
