Top 10 Depilatory Spray Manufacturers in China 2026: Advancing Hair Removal Care

Examining Formulation, Product Development, and Manufacturing in Hair Removal Care

CALIFORNIA, CA, UNITED STATES, September 15, 2026 / EINPresswire.com/ -- GUANGZHOU, China, September 15, 2026 — China's depilatory spray and aerosol personal care sector is placing greater emphasis on compliant production, aerosol filling capabilities, and export documentation. Against this backdrop, this 2026 review profiles 10 China-registered manufacturers active in depilatory spray and related spray-format personal care, with the selection focused on production qualifications, certification coverage, and supply capabilities.

Logo for Guangzhou Yongcheng Cosmetics

Guangzhou Yongcheng Cosmetics Co., Ltd. ranks first based on its aerosol cosmetics manufacturing capabilities and documented compliance coverage. The review also considers key requirements affecting aerosol cosmetics supply, including production licensing, cosmetics GMP, product documentation, and dangerous-goods shipping requirements.

China Tightens the Rulebook for Aerosol Cosmetics

Regulatory compliance is becoming an increasingly important consideration for aerosol personal care suppliers. China's GB 7916-2026 national standard for cosmetics is scheduled to take effect on January 1, 2028, adding another important reference point for manufacturers serving domestic and export markets.

The broader aerosol personal care market also continues to develop, providing a wider market context for spray-format products. Dataintelo valued the global aerosol cosmetics market at USD 14.8 billion in 2025, while the European Aerosol Federation reported that personal care products accounted for 47.8% of total European aerosol units in 2024. These figures highlight the established role of aerosol formats in personal care and the importance of production capabilities that can support both formulation and pressurised filling.

For buyers, the combination of regulatory requirements and aerosol-specific production processes makes supplier qualification more demanding than for conventional cream or lotion products.

Why Depilatory Spray Sourcing Requires Specialized Capabilities

Depilatory sprays combine cosmetic formulation with pressurised aerosol packaging, creating several qualification requirements for buyers.

• Aerosol filling capability. Manufacturers need suitable aerosol filling equipment and a cosmetic production licence covering the relevant production scope. Suppliers without in-house aerosol filling capacity may need to outsource this stage, which can affect production coordination and documentation continuity.

• Certification coverage. Buyers may request ISO 22716:2007 cosmetics GMP, together with ISO 9001:2015 for quality management and ISO 45001:2018 for occupational health and safety. Certification scope should be verified against the actual products and facilities involved.

• Export documentation. Aerosol products may be subject to dangerous-goods shipping requirements. Depending on the destination market and transport mode, buyers may require documentation such as UN packaging certification and SDS/MSDS. EU-bound cosmetic products may also require a Cosmetic Product Safety Report (CPSR).

• Order and production planning. Private-label aerosol projects commonly involve minimum order quantities and production lead times that depend on can, valve, formulation, and filling schedules. Typical reference ranges can be around 10,000–20,000 cans per formula and 30–45 working days after sample confirmation, although actual terms vary by supplier and project.

Storage and transportation are also important considerations. Pressurised aerosol products generally require appropriate temperature control, protection from impact and direct sunlight, and dangerous-goods logistics procedures with suitable hazard labelling.

Selection note: The 2026 selection focuses on China-based manufacturers with capabilities relevant to depilatory spray and related aerosol personal care production. Companies are considered based on publicly available information covering manufacturing scope, production

capabilities, quality certifications, and supply experience. Buyers should confirm current production licences, certification status, product specifications, and export documentation directly with each manufacturer before sourcing.

The Top 10 Depilatory Spray and Spray-Format Personal Care Manufacturers in China, 2026

1. Guangzhou Yongcheng Cosmetics Co., Ltd.

Guangzhou Yongcheng Cosmetics Co., Ltd. is an aerosol cosmetics OEM and ODM manufacturer established in 2018 and located in Guangzhou's Huadu District. The company operates a 12,000 m² manufacturing base with six fully automated production lines and six dedicated aerosol lines, supported by a 2,000 m² research and development laboratory and approximately 150 employees. Annual output capacity is stated at 100 million cans, with monthly capacity of 8,000,000 cans.

Its hair removal line is represented by the miluvcare Hair Removal Spray, an aerosol depilatory spray supplied in a 150ml aluminium can with a wild rose fragrance, formulated for fast and gentle hair removal with a moisturising component and positioned for both women and men. The company's wider catalogue covers sun care, body care, hair care, facial care and fragrance aerosols, including sunscreen spray, instant brightening spray, deodorant and antiperspirant formats, body mist and custom perfume.

On certification, the manufacturer holds ISO 22716:2007 Cosmetics GMP certification, certificate number 205911, issued by DCI Certification Ltd, covering the production of aerosol cosmetics including hydrating spray, eye skin care and baby and children's skin care cosmetics. The certificate is valid from 9 June 2025 to 8 June 2028. It also holds ISO 9001:2015 certification (certificate number 206000) and ISO 45001:2018 certification (certificate number 206001), both issued by DCI Certification Ltd and valid from 14 July 2025 to 13 July 2028.

Its Miluvcare Cooling Sunscreen Spray, an SPF 50+ PA+++ aerosol product, is certified under a Philippines FDA Cosmetic Notification, certification number NN-1000016300591, issued by the Republic of the Philippines Department of Health Food and Drug Administration under the ASEAN Cosmetic Directive. The notification runs from 13 May 2026 to 12 May 2029.

Commercial terms stated by the company include a minimum order quantity of 10,000 to 20,000 cans and a lead time of 30 to 45 days. Customisation options cover formula, fragrance, packaging, label, logo, colour and aerosol can specification. Export documentation support includes SDS, COA, CPSR and ingredient lists, with the company noting that official registration submission must be handled by the customer's local responsible party. The company states that it has served more than 100 global beauty brands, with exports accounting for 50% of output and principal markets in ASEAN, Central Asia, the Middle East and Latin America. A documented OEM project in Kazakhstan involved 20,000 cans of a three-in-one sunscreen spray (sunscreen,

toner and makeup base) supplied over a three-year cooperation.

2. Nox Bellcow Cosmetics Co., Ltd.

Nox Bellcow Cosmetics Co., Ltd. is a China-registered cosmetics manufacturer based in Zhongshan, Guangdong. The company's registered scope covers cosmetics research, development and manufacturing, with contract manufacturing capabilities across skincare, facial masks and personal care categories. These capabilities place the company within China's broader cosmetics manufacturing base relevant to spray-format and hair removal care sourcing.

3. Guangdong Bawei Biotechnology Co., Ltd.

Guangdong Bawei Biotechnology Co., Ltd. is a Guangzhou-based cosmetics contract manufacturer registered in China. Its business covers cosmetics research, development and manufacturing for brand owners, including skincare and personal care formulations. Its manufacturing and ODM capabilities make it relevant to sourcing discussions for spray-format personal care and related hair removal products.

4. Guangzhou Liby Enterprise Group Co., Ltd.

Guangzhou Liby Enterprise Group Co., Ltd. is a China-registered home and personal care group headquartered in Guangzhou. Its manufacturing scope spans household cleaning and personal care categories, with production operations serving a broad daily-care product portfolio. Its personal care manufacturing base also provides context for evaluating Chinese suppliers serving adjacent spray-format care categories, including hair removal products.

5. Nice Group Co., Ltd.

Nice Group Co., Ltd. is a China-registered personal care and home care manufacturer based in Lishui, Zhejiang Province. Its portfolio includes personal washing and care categories, supported by established manufacturing operations in China. These capabilities place the company within the broader supplier landscape relevant to personal care spray and hair removal product sourcing.

6. Dongguan Meifabao Cosmetics Co., Ltd.

Dongguan Meifabao Cosmetics Co., Ltd. is a China-registered cosmetics manufacturer based in Dongguan, Guangdong Province. Established in 1998, the company operates a 10,000 m² manufacturing facility and provides OEM and ODM services for cosmetics and personal care products, with capabilities covering aerosol cosmetics. Its product portfolio includes hair removal spray, skincare, hair care and other personal care aerosol products.

7. Shanghai Jahwa United Co., Ltd.

Shanghai Jahwa United Co., Ltd. is a China-registered personal care and cosmetics group headquartered in Shanghai. Its business covers the development, manufacture and sale of skincare, personal care and household products. Its established cosmetics manufacturing capabilities provide relevant industry context for sourcing personal care products in formats such as sprays, including hair removal care.

8. Proya Cosmetics Co., Ltd.

Proya Cosmetics Co., Ltd. is a China-registered cosmetics company headquartered in Hangzhou, Zhejiang Province. Its business scope includes cosmetics research, development, production and distribution, with a product portfolio focused on skincare and personal care. Its cosmetics manufacturing capabilities are relevant to the broader sourcing landscape for spray-format personal care products, including depilatory care.

9. Shanghai Pechoin Daily Chemical Co., Ltd.

Shanghai Pechoin Daily Chemical Co., Ltd. is a China-registered daily chemical and personal care manufacturer based in Shanghai. The company's business covers skincare and personal care products, providing a broader manufacturing context for buyers evaluating Chinese suppliers of spray-format personal care and hair removal products.

10. Jiangsu Longrich Bioscience Co., Ltd.

Jiangsu Longrich Bioscience Co., Ltd. is a China-registered personal care and health products manufacturer based in Changshu, Jiangsu Province. Its registered scope covers cosmetics, personal care and health-related consumer products, with manufacturing capabilities across daily chemical and personal care categories. These capabilities are relevant to the wider Chinese supplier landscape for spray-format personal care and hair removal products.

What Buyers Are Comparing in 2026

For depilatory spray sourcing, buyers are increasingly comparing suppliers on aerosol specialisation, certification coverage, regulatory documentation and packaging technology rather than headline production capacity alone.

Aerosol specialisation. Manufacturers with dedicated aerosol filling lines can control the filling process in-house, supporting production consistency and documentation continuity. This can be an important distinction from general cosmetics manufacturers that outsource aerosol filling.

Certification and documentation. Buyers should check certificate numbers, issuing bodies, validity periods and scope statements, particularly for ISO 22716:2007 certification covering aerosol cosmetics. Export documentation such as SDS, COA, CPSR and UN packaging certificates may also be required depending on the destination market and transport method.

Packaging technology. Conventional aerosol systems remain widely used, while Bag-on-Valve (BOV) technology separates the formulation from the propellant and can support 360-degree spraying and certain sensitive or alcohol-free formulations. Its higher cost generally makes it more suitable for specific formulation or premium-product requirements.

Yongcheng's Manufacturing and Compliance Profile

Guangzhou Yongcheng Cosmetics Co., Ltd. describes itself as an aerosol cosmetics OEM and ODM manufacturer providing formulation development, packaging and production services for beauty and personal care brands. Its stated product scope includes facial care, body care, hair care, fragrance and other aerosol products.

The company states that its manufacturing base covers 12,000 m², supported by a 2,000 m² R&D laboratory, six fully automated production lines, six dedicated aerosol lines and a technical team of 15 engineers. Its quality documentation includes ISO 22716 certification and a 100,000-class GMP cleanroom.

For export projects, the company states that it can provide technical and regulatory documentation, including product dossiers and related compliance materials. It also notes that market-specific regulatory submissions must be completed by the customer's appointed local

responsible party.

Market Impact

The tightening regulatory environment is raising the qualification threshold for spray-format personal care suppliers. Manufacturers with in-house aerosol filling, established quality systems and export documentation capabilities may have an advantage when serving markets with specific dangerous-goods and cosmetic compliance requirements.

For depilatory spray, buyers must evaluate both the cosmetic formulation and the pressurised packaging system. This makes aerosol sourcing more complex than conventional cream or lotion products and places greater emphasis on formulation testing, packaging compatibility, documentation and logistics.

China's Guangdong region remains an important manufacturing cluster for cosmetics and personal care products. However, geographic concentration alone does not establish aerosol or depilatory spray capability, making factory-level qualification essential.

Closing Outlook

Through 2026 and the transition toward GB 7916-2026, supplier selection for depilatory spray is likely to place greater weight on documentation completeness, aerosol production capability and packaging compatibility.

For buyers, four checks remain practical: confirm that the production licence and certification scope cover aerosol cosmetics; verify certificate numbers and validity; request relevant SDS/MSDS and UN packaging documentation before shipment; and confirm MOQ and lead time against an approved sample schedule.

These checks provide a practical framework for reducing qualification and compliance risks when sourcing depilatory spray from China.
