AIM Helps Colorado Second-Home Owners Simplify Life Away from Home

ENGLEWOOD, CO, UNITED STATES, September 16, 2026 / EINPresswire.com/ -- For many Colorado second-home owners, time at their mountain property is meant to be an escape. However, when the home sits empty between visits, managing it from afar can be a challenge.

Hunter Douglas Designer Screen Shades with PowerView® Automation Installed in Conifer, CO Home

AIM, Colorado's leading experts in custom window treatments and lighting control, helps second-home and vacation-property owners simplify their homes with automation that keeps everyday routines running even when they're away.

With Hunter Douglas PowerView® Automation, homeowners can program window treatments to open and close on customized schedules throughout the day. Instead of leaving shades in the same position for days or weeks, automated schedules can adjust them based on the time of day, privacy needs, and sunlight.

This can be especially beneficial for Colorado homes with large windows and expansive mountain views. While these windows are a major part of the home's appeal, prolonged exposure to intense sunlight and UV rays can affect flooring, furniture, artwork, and other interior finishes.

Window treatments are only one part of creating a more convenient second home. AIM also offers Lutron Smart Lighting Systems, giving homeowners greater control over lighting throughout the property.

Homeowners can create automated lighting schedules, control lights through the Lutron App, and integrate the system with compatible smart home technology. Features such as geofencing

can adjust lighting based on when homeowners leave or return to the property.

Lutron's Smart Away feature can also randomly turn selected lights on and off during the evening while homeowners are away, helping create the appearance that the property is occupied.

Together, smart window treatments and lighting control can make arriving and leaving a second home easier. Instead of adjusting individual shades and lights throughout the property each time they come and go, homeowners can create routines that handle many everyday tasks automatically.

For mountain properties with large windows, hard-to-reach shades, multiple floors, or numerous lighting zones, that convenience can make an even greater difference.

AIM serves homeowners throughout Colorado, from Denver and Fort Collins to Colorado Springs, as well as Western Slope communities including Silverthorne, Dillon, Frisco, Vail, Aspen, and Grand Junction.

Colorado second-home owners interested in simplifying their properties with automated window treatments and lighting control can schedule a free in-home consultation with AIM to explore solutions tailored to their home, lifestyle, and automation needs. Visit https://aimyourhome.com/ to learn more.

About AIM
AIM is a locally owned Colorado company specializing in custom window treatments and whole-home lighting control systems. As an authorized dealer and installer for leading brands including Hunter Douglas, Alta, Carole Fabrics, Insolroll, and Lutron, AIM delivers personalized solutions designed to enhance comfort, style, and efficiency. With a focus on quality craftsmanship and customer care, AIM helps homeowners create spaces that are both functional and beautifully designed.
