Commercial Aircraft Manufacturing Market Size To Reach $408.37Billion By 2030 At A CAGR Of 6.7%

The Business Research Company's Commercial Aircraft Manufacturing Market Size To Reach $408.37Billion By 2030 At A CAGR Of 6.7%

The Business Research Company

LONDON, GREATER LONDON, UNITED KINGDOM, September 16, 2026 /EINPresswire.com/ -- "The commercial aircraft manufacturing sector has experienced substantial growth in recent years, driven by increasing global demand for air travel and cargo transport. This industry plays a critical role in connecting economies worldwide through passenger and freight services. Let's explore the current market size, growth prospects, primary growth drivers, and regional dynamics shaping this vital market.

> Expected to grow to $408.37 billion in 2030 at a compound annual growth rate (CAGR) of 6.7%"

Market Size and Projected Growth Trajectory for the Commercial Aircraft Manufacturing Market

The commercial aircraft manufacturing market has expanded significantly, with its value rising from $295.95 billion in 2025 to an anticipated $315.07 billion in 2026, reflecting a compound annual growth rate (CAGR) of 6.5%. This historical growth has been fueled by the surge in global air passenger traffic, the expansion of low-cost carrier networks, increasing international trade, growing demand for aircraft replacements, and airline fleet growth programs.

Download a free sample of the commercial aircraft manufacturing market report: https://www.thebusinessresearchcompany.com/sample_request?id=36227267&type=smp&name=Commercial%20Aircraft%20Manufacturing%20Market%20Report%202026&utm_source=EINPresswire&utm_medium=paid&utm_campaign=Sep_PR

Looking ahead, the market is set to continue its upward trend, expected to reach $408.37 billion by 2030 at a CAGR of 6.7%. Factors contributing to this future growth include a rising demand for

fuel-efficient airplanes, ongoing aircraft fleet modernization efforts, the expansion of air cargo transport, heightened investments in next-generation aircraft technologies, and growth in emerging aviation markets. Key trends shaping the market's evolution involve greater use of lightweight composite materials in aircraft structures, increased production of fuel-saving aircraft models, a growing appetite for long-range and high-capacity planes, investments in safety and performance enhancements, and expansive fleet replacement and modernization initiatives.

Commercial Aircraft Manufacturing Market Report 2026 Market Overview

Understanding Commercial Aircraft Manufacturing and Its Scope
Commercial aircraft manufacturing encompasses the comprehensive process of designing, developing, and producing airplanes intended for passenger and cargo transportation. This sector involves intricate engineering, utilization of cutting-edge materials, and adherence to rigorous regulatory standards to ensure safety, operational efficiency, and performance across the global aviation network.

Rising Air Passenger Traffic as a Primary Growth Catalyst
One of the most significant factors propelling growth in the commercial aircraft manufacturing market is the steady increase in air passenger traffic. This metric tracks the number of travelers transported via domestic and international flights over specific periods and serves as a crucial gauge of air travel demand. The rise in passenger volumes is largely driven by improved disposable incomes, enabling more people to afford air travel for both business and leisure purposes.

Sustained growth in passenger numbers directly stimulates demand for new aircraft deliveries. This, in turn, encourages airlines to expand their fleets and boosts production volumes within the manufacturing sector. For example, in October 2024, data from the U.S. Department of Transportation showed that 647,205 flights were operated in August 2024—marking a 2.61% increase compared to 630,761 flights in August 2023. Such figures underscore the growing importance of air travel, which supports the commercial aircraft manufacturing market's

expansion.

Dominant Regional Players and Fastest Growing Markets in Commercial Aircraft Manufacturing

In 2025, North America held the leading position as the largest regional market in commercial aircraft manufacturing. Meanwhile, the Asia-Pacific region is projected to experience the fastest growth during the forecast period. The market report covers a diverse set of geographical areas including Asia-Pacific, South East Asia, Western Europe, Eastern Europe, North America, South America, the Middle East, and Africa, providing a broad perspective on regional performance and opportunities.

Key enhancements in our 2026 market reports include:

• Market attractiveness scoring and analysis
• Total addressable market (TAM) analysis
• Company scoring matrix graphics and tables
• Excel-based forecasting dashboards
• Market hotspots infographics
• Key technologies and future trend analysis
• Updated graphics and tables
