Certified Safety Experts Expands Crane Inspection Services in North Carolina

Cary, NC-based safety firm provides OSHA-compliant crane inspections and NCCCO-backed certification to construction and industrial sites statewide.

CARY, NC, UNITED STATES, September 16, 2026 /EINPresswire.com/ -- Certified Safety Experts, a construction safety training and inspection company based in the Raleigh-Durham area, today highlighted its OSHA-compliant crane inspection services now available to construction and industrial sites across North Carolina.

Under OSHA regulations, cranes must be inspected regularly by qualified personnel to identify and correct hazards before they lead to accidents. Certified Safety Experts' inspectors evaluate the mechanical and structural integrity of cranes, checking components such as wire ropes, hooks, load indicators, brakes, and structural elements for misalignment, wear, or deformation.

"Cranes carry some of the highest risk on any jobsite, so inspections aren't a box to check they're what keeps crews safe and projects on schedule," said Marty Shuman, Owner of Certified Safety Experts. "Our job is to catch a problem before it becomes an incident."

The company offers a full range of inspection types, including annual and routine inspections, pre-use checks, post-incident evaluations, and compliance audits. Crane inspections are offered alongside inspections for rigging and lifting gear, heavy equipment, forklifts, and aerial lifts, giving contractors a single provider for jobsite equipment safety.

Certified Safety Experts is a recognized training provider affiliated with the National Commission for the Certification of Crane Operators (NCCCO) and offers preparatory training and exams for crane operators, riggers, signal persons, lift directors, and crane inspectors. The company's certification and training programs cover mobile cranes, tower cranes, articulating boom cranes, aerial lifts, and forklifts.

The company currently serves construction and industrial clients across North Carolina,

including Raleigh, Cary, Durham, Charlotte, Greensboro, Winston-Salem, Asheville, and Wilmington, with both on-site and individual training options available.

Beyond crane-specific services, Certified Safety Experts supports employers with broader safety compliance needs, including management assist visits and audits, accident investigations, expert witness testimony, and safety staffing, all aimed at helping companies meet or exceed OSHA requirements.

Businesses and individuals in North Carolina looking to schedule a crane inspection or learn more about certification options can request a quote at https://certifiedsafetyexperts.com/inspection/ or by calling (919) 373-6769.
