

SYNC and Aryze Partner to Bring Digital Asset Infrastructure into Secure Communications

The partnership will integrate Aryze's stablecoin infrastructure into SYNC's wallet, while bringing SYNC's secure communications technology to Aryze's network.

COPENHAGEN, DENMARK, September 16, 2026 /EINPresswire.com/ -- SYNC SuperApp, the secure communications and financial services platform operated by SYNC Global Technologies Pte. Ltd., today announced a strategic partnership with [Aryze](#) ApS, a Copenhagen-based fintech providing tech infrastructure for regulated institutions and payment providers.

SYNC and Aryze partner to bring digital asset infrastructure into secure communications.

The partnership will work both ways. SYNC will integrate Aryze's [stablecoin infrastructure](#) and fiat on- and off-ramp partner capabilities into the SYNC wallet, allowing users to hold and

“

Stablecoins are becoming part of the financial system, but the infrastructure around them is still fragmented.”

Simon Fasdal, Chief Executive Officer, Aryze

transfer digital currency within the same environment where they communicate — always within a regulated framework. Aryze will bring SYNC's secure communications technology to its merchants, licensed issuers and regulated financial institutions.

The aim is simple: to make sending digital money as easy as sending a message, designed for full compliance.

Connecting Communication and Financial Services

SYNC provides a secure communications experience. The partnership with Aryze adds blockchain-based payment infrastructure to it, creating a closer connection between how people communicate and how they move money.

"Privacy and financial control should not be separate products. Money increasingly moves at the speed of communication, and people should not have to give up privacy to keep up. Aryze gives us the infrastructure to make that possible."

— Sam Kapil, Chief Executive Officer, SYNC SuperApp

"Stablecoins are becoming part of the financial system, but the infrastructure around them is still fragmented. Together, we combine secure communication and blockchain rails, as a unified infrastructure to work in any regulated environment, and with any financial institution."

— Simon Fasdøl, Chief Executive Officer, Aryze

Stablecoins Are Moving Into Mainstream Finance

The stablecoin market surpassed USD 300 billion in 2026, as financial institutions, payment providers and technology companies increasingly look at stablecoins as infrastructure for digital payments. The partnership with SYNC brings that infrastructure together with a secure communications platform, connecting digital payments with secure communication in a single user environment. Rollout is planned for Q1 2027.

About SYNC SuperApp

SYNC SuperApp is a secure communications and financial services platform developed by SYNC Global Technologies Pte. Ltd., a Singapore-incorporated fintech company. The application combines secure messaging with embedded financial services and an integrated wallet. Available on iOS and Android.

About Aryze

Founded in 2017, Aryze ApS is a Copenhagen-based fintech company providing modular digital asset infrastructure for use by merchants, licensed issuers and regulated financial institutions. Aryze's platform adapts to a wide range of use cases across regulated environments.
