

CoPoint hires Kelly Habbas to Join as Vice President

Kelly Habbas joins CoPoint AI, an Enterprise AI consultancy, bringing 30 years of executive experience

DALLAS, TX, UNITED STATES, September 21, 2026 /EINPresswire.com/ -- CoPoint AI announced today that Kelly Habbas has joined the firm to assist with its growth plans. Habbas joins CoPoint as Vice President, effective September 23, 2026, responsible for solidifying delivery, creating growth, and building executive relationships. He will work alongside co-founder and CEO John Humphrey and President and COO Dipesh Patel from the company's Dallas headquarters.

“

Kelly has been on both sides of the table both as a delivery consultant and a CIO. We find our clients want to talk to people who can help define the art of the possible and move quickly to solutions.”

John Humphrey

“Kelly has been on both sides of the table both as a delivery consultant and as a CIO,” said Humphrey. “We have found that our clients want to talk to people who can help define the art of the possible and move quickly to

solutions. Kelly is uniquely qualified to deliver on this value proposition.”

“The target client at CoPoint AI is the CXO who knows they have to move on AI, but they need help early in that cycle,” said Habbas. “I’m excited because I’ve been in the CIO seat and understand the complexity from an opportunity, but also a risk and safety perspective.”

Habbas has served as CIO at a variety of retail energy companies including Clearview, Stream and Direct Energy. He was CIO at Brinks Home Security for a number of years and learned consulting at Arthur Andersen, Hitachi and CapGemini.

About CoPoint AI. CoPoint AI is an enterprise AI consulting and engineering firm that helps organizations move from AI opportunity to business impact. We work with executives who understand the potential of AI but want an experienced guide to help determine where to start, what to prioritize, and how to execute.

Our teams combine strategic advisory with hands-on engineering across three rapidly evolving areas of enterprise AI: agentic software development, vector and elastic search for enterprise

knowledge, and agent orchestration. This combination allows CoPoint AI to help clients not only define what is possible with AI, but build and deploy practical solutions that create measurable business value.
