

DealerDoc Announces Automated Tax Reciprocity Capabilities for Dealerships Nationwide

The ultimate single point out-of-state titling solution for all 50 states allows dealers to seamlessly calculate reciprocal taxes.

PLANO, TX, UNITED STATES, September 17, 2026 /EINPresswire.com/ -- As out of state vehicle sales continue to rise, dealerships face a growing

administrative hurdle: navigating complex, ever changing tax reciprocity laws. DealerDoc today announced a major upgrade to its industry leading platform, making it fully compliant with the latest interstate tax reciprocity rules.

“

We understand that sales, finance, and the title department have to work seamlessly in a dealership, and out of state taxes have traditionally been one of their biggest headaches.”

DealerDoc Team

As an easy to use, single point solution for all 50 states, DealerDoc provides immediate relief for title clerks and dealership back offices at independent lots, dealer groups, and publicly traded franchise stores nationwide.

Evolving Beyond the Basics: New Tax Splitting Technology
Historically, dealerships have known about tax reciprocity, but handling it was often manual or optional. While reciprocity was previously built into the DealerDoc platform as an optional field specifically tailored for states like Michigan and Arizona, the system has now

completely evolved to service dealers with reciprocal needs in all 50 states.

For the first time, DealerDoc’s software features the advanced ability to explicitly split out a dealer’s home state taxes versus the reciprocity tax. This new functionality eliminates the manual math and guesswork that previously slowed down out of state transactions.

Built for High Volume, Cross Border Success

Navigating state to state tax credits is notoriously complex, especially in high volume transit

states. This new system is a game changer for dealerships operating in states like Florida, Illinois, New Jersey, and Maryland—while remaining fully optimized for transactions across all 50 states.

DealerDoc's automated engine ensures a stress free experience through the following features:

- Precise Tax Splitting: A brand new capability that allows dealerships to clearly split and separate state taxes versus reciprocity taxes, ensuring total accounting accuracy.
- Comprehensive Deal Packets: When title clerks print out deal packets directly from DealerDoc, the exact reciprocity taxes are now automatically calculated, documented, and included based on the specific states involved.
- A True 50 State Solution: A unified, highly intuitive platform that effortlessly handles the sometimes guesswork and tax nuances of every state in the country.

A Step Above the Rest

"We understand that sales, finance, and the title department have to work seamlessly in a dealership, and out of state taxes have traditionally been one of their biggest headaches," says the DealerDoc team. "By integrating real time tax reciprocity and tax splitting into our software, we are doing the heavy lifting for them to make those transitions smooth. Coupled with our industry leading customer service and dedicated concierge team, DealerDoc is truly a step above the rest."

With these enhancements, DealerDoc continues to give dealership staff the tools they need to close out of state deals faster, protect their margins, and focus on delivering a superior customer experience.

About DealerDoc

DealerDoc is a premier automotive software solution dedicated to streamlining title, registration, and compliance workflows for all types of automotive dealerships. By automating complex administrative tasks and providing world class concierge support, DealerDoc helps dealerships operate more efficiently across all 50 states.
