

Canadian Phosphate Becomes a B2i Digital Featured Company

Mineral Exploration Company Is Drilling in British Columbia and Has Acquired an Advanced Phosphate Project in Utah

NEW YORK, NY, UNITED STATES,
September 17, 2026 /

EINPresswire.com/ -- [B2i Digital, Inc.](#) today announced [Canadian Phosphate Limited](#) (ASX: CP8 | OTCQB: CPHOF) as its newest [Featured Company](#). The Australian company is building a phosphate business across North America, in a mineral the United States, Canada and the European Union each classify as critical. B2i Digital will introduce the company to its network of retail and institutional market participants, with a full Canadian Phosphate profile coming to [b2idigital.com](#).

First Assay Results Are Due in September, With an Updated Mineral Resource Estimate Expected in the Fourth Quarter

"Canada imports about \$2 billion of phosphate fertilizer a year and mines none of its own phosphate. It makes its own nitrogen and potash, so phosphate is the gap," said David Shapiro, Chief Executive Officer of B2i Digital, Inc. "Canadian Phosphate is drilling in British Columbia right now and closed on a Utah project next door to one of Simplot's mines in July. It's an impressive team, and our job is to put them in front of US investors."

“

Canadian Phosphate is drilling in BC right now and closed on a Utah project next door to one of Simplot's mines in July. It's an impressive team, and our job is to put them in front of US investors."

David Shapiro, Chief Executive Officer of B2i Digital, Inc.

The company holds 100% of the Wapiti and Fernie projects in British Columbia and, since July, 100% of the Diamond Mountain project in Utah. A 3,000-meter drilling program is underway at Wapiti under Dahrouge Geological Consulting. On September 8, 2026, the company reported

that it had extended the phosphate-bearing seam to about 9 kilometers on the eastern limb, materially improving its understanding of the geology, geometry and structure of the Wapiti deposit. Assays are due in September, with an updated Mineral Resource Estimate under the

Joint Ore Reserves Committee (JORC) Code expected in the fourth quarter. Diamond Mountain sits on state-owned land about 35 kilometers northeast of Vernal, Utah, adjacent to Simplot's 4 million tonne per year Vernal phosphate mine.

In August, the company added a US listing, trading on the OTCQB Venture Market under CPHOF alongside its listing on the Australian Securities Exchange (ASX). The current work program is funded from a rights issue and placement completed in the second quarter, in which every one of the company's directors took part.

Managing Director and Chief Executive Officer Daniel Gleeson spent 20+ years in agribusiness across Australia, Asia, North America and Europe. The board adds Blackwood Capital co-founder Stuart Richardson as Non-Executive Chairman, 35-year financial adviser Malcolm Weber, and Peter Doyle, a Canada-based mining veteran who joined in the second quarter.

"Our strategy is to build a vertically integrated, mine-to-market phosphate business across North America," said Gleeson. "The drilling underway at Wapiti and the Diamond Mountain acquisition in Utah are both part of that build. Working with B2i Digital lets us explain the plan to a much broader group of North American investors."

About B2i Digital, Inc.

B2i Digital, Inc. partners with conferences, public companies, and capital markets advisors through its Featured Conference, Featured Company, and Featured Expert programs. Its media network spans 800+ news, broadcast, and trade outlets with a 330 million+ combined monthly audience, plus 1.7 million+ followers, 70,000 opt-in email subscribers, and a rolodex of 235,000+ capital markets contacts.
