InventionHome® Product Developer Creates Decorative Planter and Sheltered Feeding Station for Hummingbirds

SPOKANE, WA, UNITED STATES, September 17, 2026 / EINPresswire.com/ -- Arlan H. of Spokane, WA is the creator of Hummingbird Heaven, a combined hanging planter and hummingbird feeder designed to provide a more sheltered and visually integrated feeding environment for hummingbirds. The system combines two traditionally separate outdoor elements, a decorative hanging planter and a bird feeder, into a single suspended structure.

The invention consists of a hanging planter positioned above a hummingbird feeder that is secured to the underside of the planter. The planter can accommodate live flowers, greenery, or artificial plants, creating overhead foliage around the feeding area. This arrangement provides hummingbirds with a feeding location that is partially sheltered by the planter while also allowing the unit to function as an integrated decorative feature for patios, porches, gardens, campsites, and other outdoor environments.

A key aspect of Hummingbird Heaven is its removable feeder attachment system. In one embodiment, the feeder incorporates a male threaded connection that engages with a recessed female threaded fitting located within the bottom portion of the planter. The threaded connection provides a secure mounting point while allowing the feeder to be detached when cleaning the feeder or replenishing nectar. Positioning the attachment within the lower portion of the planter also contributes to the compact, integrated configuration of the assembly.

Key features and benefits include:

- Integrates a planter and feeder: Combines a hanging planter and hummingbird feeder into a single outdoor unit rather than requiring separate decorative and feeding components.
- Provides overhead shelter: Positions foliage above and around the feeder to create a more sheltered feeding environment for hummingbirds.
- Supports natural or artificial plants: Allows users to select live flowers, greenery, or artificial plants based on their preferred appearance and maintenance requirements.
- Creates a naturalistic feeding setting: Surrounding the feeder with foliage provides a more visually natural environment for visiting hummingbirds.
- Maintains a compact configuration: Integrates the feeding station beneath the planter to create a unified hanging structure.
- Blends with outdoor surroundings: Provides a decorative alternative to conventional feeders that may appear primarily functional.

Conventional hummingbird feeders are generally suspended as standalone devices, which leaves the feeding area exposed to direct sunlight and surrounding outdoor conditions. Extended exposure to sunlight can increase nectar temperature and may contribute to faster deterioration. Traditional feeders also provide limited overhead cover and may require additional hooks, planters, or decorative elements when users want to incorporate a feeding station into an existing outdoor design.

Hummingbird Heaven addresses these challenges through its combined planter-and-feeder configuration. The invention introduces overhead foliage and potential shade without requiring the user to install separate components by placing the feeder beneath a plant-filled structure. The removable threaded attachment further provides a practical means of accessing the feeder for routine cleaning and nectar refilling.

Arlan filed his Utility Patent with the United States Patent and Trademark Office (USPTO) and is working closely with InventionHome, a leading invention licensing firm, to sell or license the

patent rights to his Hummingbird Heaven product. Ideal licensing candidates would be U.S. based product manufacturers or distributors looking to further develop and distribute this product innovation.

Companies interested in Hummingbird Heaven can contact InventionHome at member@inventionhome.com. Inventors currently looking for assistance in patenting, marketing, or licensing their invention can request information from InventionHome at info@inventionhome.com or by calling 1-866-844-6512.

About InventionHome®

InventionHome® is a top-rated invention marketing and product licensing company dedicated to helping inventors successfully patent, prototype, and promote their new product ideas. From securing intellectual property to connecting with potential licensees, InventionHome® offers a streamlined path to commercialization.
