

PIRAEUS MEDICAL ANNOUNCES the US LAUNCH and FIRST CASES of the 6F 70 NeuGlide CATHETER, FOLLOWING FDA CLEARANCE

The 6F 70 NeuGlide expands Piraeus Medical's growing neurointerventional access portfolio, joining the 7F 87 NeuGlide+™ and 8F 93 NeuFlex™ Catheters.

MAPLE GROVE, MN, UNITED STATES, September 18, 2026 /EINPresswire.com/ -- Piraeus Medical is excited to announce the U.S. launch and first clinical cases of the 6F 70 NeuGlide Catheter, following FDA clearance.

The 6F 70 NeuGlide expands Piraeus Medical's growing neurointerventional access portfolio, joining the [7F 87 NeuGlide+™](#) and [8F 93 NeuFlex™](#) Catheters.

Three catheter platforms. 6F, 7F, and 8F access. One distinct approach to catheter design.

Built on Piraeus Medical's patented linerless catheter construction, the 6F 70 NeuGlide is engineered to optimize inner diameter relative to outer diameter while combining distal flexibility with proximal support.

The addition of the 6F 70 NeuGlide represents another step in Piraeus Medical's mission to rethink neurovascular access and give physicians new tools for navigating increasingly complex procedures.

Following one of the first U.S. cases with the 6F 70 NeuGlide, Dr. Brinjikji shared:

"It was an honor to perform the first-in-human case with the new 6F NeuGlide from Piraeus. I haven't seen anything like it, the proximal support and distal flexibility of the catheter allowed us to achieve the distal positioning necessary to successfully take down a complex dAVF, all through 6F access."

The account provided is genuine and documented. It represents a unique individual experience and does not provide any indication, guidance, warranty, or guarantee regarding the response or experience other individuals may have with Piraeus Medical technologies.

Piraeus Medical is creating high quality, uniquely engineered products designed to meet unmet needs in the neurointerventional market.

Indications for Use: The 70 NeuGlide Catheter is indicated for the introduction of interventional devices into the peripheral, coronary, and neuro vasculature.

The indications for use above apply to the 70 NeuGlide, 87 NeuGlide+, and 93 NeuFlex Catheters. Indications, contraindications, warnings, and instructions for use can be found in the product labeling supplied with each device. For Healthcare Professionals Use Only.
