

The Tokenized Asset Foundation and E-Sutra Sign MoU to Advance Tokenized Assets in India

E-Sutra named the Foundation's Official India Partner under a collaboration spanning education, standards, ecosystem development and cross-border engagement

MIAMI, FL, UNITED STATES, September 21, 2026 /EINPresswire.com/ -- The Tokenized Asset Foundation and [E-Sutra](#) Association today announced that they have signed a Memorandum of Understanding establishing a non-exclusive strategic collaboration to

support credible, compliant and institutionally relevant tokenization, digital securities and real-world asset initiatives in India and internationally.

“

Your Gateway to Global Real World Asset Tokenization. Bringing together the people, knowledge, resources, and opportunities shaping the future of Real-World Asset tokenization globally.”

Randy Goldberg

Under the MoU, E-Sutra will serve as the Foundation's Official India Partner. The collaboration brings together the Foundation's international education, standards, membership and industry network with E-Sutra's relationships and convening capabilities across India's Web3, financial, policy and professional communities.

The organizations plan to develop practical channels for Indian issuers, financial institutions, technology providers, investors, advisers, industry bodies and policy stakeholders to engage with the wider tokenized asset ecosystem. Each organization remains independent, and

specific projects, public communications and commercial activities will require separate written approval where applicable.

Planned areas of collaboration include:

- Education and capacity building through policy dialogues, roundtables, webinars, workshops, training, research and market briefings.
- Ecosystem development via approved introductions among issuers, investors, financial institutions, infrastructure providers, and policy stakeholders.
- Participation by Indian organizations in Foundation programs, directories, events, member initiatives and educational resources.
- Jointly approved events and initiatives, including potential collaboration connected with India Blockchain Week and the IBW Institutional Forum.
- Exploration of compliant cross-border opportunities, including the India-UAE corridor and other relevant international markets.

“India is one of the world’s most important markets for the next stage of tokenized asset development,” said Randy Goldberg, President of The Tokenized Asset Foundation. “E-Sutra gives the Foundation a strong on-the-ground collaborator with the relationships and market knowledge needed to connect Indian innovators and institutions with the global ecosystem. Our goal is to support education, practical collaboration and responsible market development while respecting the legal and regulatory requirements that apply to each initiative.”

“This MoU creates a practical bridge between India’s Web3 and financial communities and an international network focused on tokenized assets,” said Kanhaiya Singh, Co-Founder of E-Sutra. “Working with The Tokenized Asset Foundation will help us expand knowledge exchange, support industry dialogue and connect Indian stakeholders with relevant global experience, partners and opportunities.”

“India’s next phase of tokenized asset adoption will depend on trust, regulatory clarity and meaningful cooperation among government, institutions, innovators and investors,” said Raj Kapoor, Chief Strategy Advisor to The Tokenized Asset Foundation. “This partnership creates a credible channel for these stakeholders to engage with global expertise, share practical knowledge and help shape responsible frameworks that can support India’s leadership in tokenized finance.”

The collaboration may also include joint or co-branded research, educational content, institutional discussions and stakeholder engagement concerning real-world asset tokenization, digital securities, custody, compliance, investor protection and market infrastructure. Neither organization will state or imply regulatory approval or government endorsement without express written confirmation from the relevant authority.

The MoU took effect on September 14, 2026. It records the organizations’ good-faith intention to

collaborate and does not create an exclusive relationship, legal partnership, joint venture or authority for either organization to bind the other.

About The Tokenized Asset Foundation

The Tokenized Asset Foundation is a global industry organization connecting issuers, investors, technology providers and professional service firms across the tokenized asset and real-world asset ecosystem. The Foundation provides education, industry resources, directories, events, market access programs and member connections designed to support the development of credible and compliant tokenized markets.
