AngelAi shines at the NAHREP Avance Global 2026 with Groundbreaking 'Loan Officer of the Future' Robot Demonstration

By blending visionary data processing with a real, interactive robotic presence, Pavan Agarwal and AngelAi delivered a view of an automated financial future.

Pavan and Loan Officer Robot Interviewed by Karen Osorio, Telemundo

LAS VEGAS, UT, UNITED STATES, September 18, 2026 / EINPresswire.com/ -- As thousands of real estate and mortgage professionals gathered at the Bellagio in Las Vegas for the National Association of Hispanic Real Estate Professionals (NAHREP) AVANCE Global 2026 conference, one presentation undeniably stole the spotlight. AngelAi®, the industry-leading artificial intelligence platform for mortgage and real estate, opened the two-day event and delivered a show-stopping demonstration that fundamentally redefined the boundaries of financial technology.

CEO of NAHREP, Gary Acosta opened the show with Agarwal's AngelAi robot captivating the audience by peeling back the curtain on how AngelAi operates. Pavan Agarwal CEO and Founder of AngelAi detailed the sheer scale of the platform's infrastructure, explaining how the system actively loads and processes millions of complex data points, spanning intricate underwriting guidelines, real-time market data, compliance regulations, and diverse loan products. By synthesizing this massive ocean of data, AngelAi has successfully created a highly intelligent, virtually infallible virtual Loan Officer capable of navigating the intricacies of the mortgage process with unprecedented speed and accuracy.

This was not a pre-recorded video or a rigid, scripted interaction. Instead, the attendees witnessed a live, real-time demonstration of an agentic, automated robotic loan officer

processing real estate transactions on the fly. Powered by AngelAi's transactional language model, the robot seamlessly interacted with the audience, answering complex scenario-based questions, analyzing credit profiles, and structuring loan options instantly. The demonstration showcased what it truly means for an AI to be "agentic." Rather than merely retrieving information like a standard chatbot, the AngelAi robot actively executed tasks, demonstrating its ability to act as an autonomous agent that can guide borrowers, support Realtors®, and streamline the lending lifecycle from application to closing.

Pavan Speaks to the audience at NAHREP

"What we showcased today at NAHREP is not a technological novelty; it is the definitive future of the mortgage industry," said Pavan Agarwal. "By processing millions of critical data points and deploying our transactional language model into a physical, agentic form, we are proving that the Loan Officer of the future is already here. We are eliminating the bottlenecks of traditional lending, removing systemic biases, and empowering professionals to serve more families with absolute confidence and unparalleled speed."

The setting for this historic demonstration could not have been more fitting. NAHREP is a purpose-driven organization dedicated to championing homeownership for the Hispanic community. Recognizing that homeownership is the cornerstone of wealth building in the United States, NAHREP serves as the vital voice for Hispanic real estate professionals and consumers. The organization focuses on expanding Latino prosperity by advocating for entire inclusive public policy, facilitating industry networking, and providing educational resources that empower its members to better serve their communities.

Jason Riveiro, Senior Advisor to the CEO, NAHREP commented "Technology plays a critical role in reducing the barriers to homeownership and leveling the playing field for all communities. I want to congratulate Pavan and AngelAi for consistently pushing the boundaries of what is possible in housing and finance. Their innovative work truly shows that Nothing is Beyond Reach."

NAHREP's importance in the real estate ecosystem is monumental. As the Latino demographic continues to drive the majority of homeownership growth in the country, the association ensures that both business and cultura intersect to create sustainable economic opportunities.

AngelAi's alignment with NAHREP highlights a shared mission: using cutting-edge innovation to break down barriers, lower the cost of lending, and increase access to homeownership for underserved communities. The automated and bias-free nature of the AngelAi virtual Loan Officer represents a massive leap forward in making fair and equitable lending a reality for all.

Throughout the three-day AVANCE Global event, the buzz around the Bellagio centered firmly on AngelAi. Attendees crowded the stage post-presentation, eager to interact with the robot and learn how they could integrate AngelAi's transactional AI into their own brokerages and lending institutions. By blending visionary data processing with a tangible, interactive robotic presence, Pavan Agarwal and the AngelAi team did more than just present a product, they delivered an unforgettable glimpse into a faster, fairer, and fully automated financial future.

About AngelAi and Celligence LLC
AngelAi is a pioneering artificial intelligence company dedicated to transforming the mortgage and real estate industries. Developed by Celligence LLC (www.celligence.com), a fast-growing fintech and AI company, AngelAi (www.AskAngel.Ai) utilizes advanced transactional language models and processes millions of real-time data points to provide agentic, automated solutions that streamline lending, eliminate human bias, and empower financial professionals to deliver exceptional, rapid service to their clients. Celligence has engineered a novel AI built from evolving, self-generating neural cells that come together to solve complex problems. Unlike generative AI, Celligence AI is deterministic and, with its patented TLM engine, delivers accurate responses accompanied by a strong warranty (see AngelAi.com/warranty) that customers can bank on.

About NAHREP
The National Association of Hispanic Real Estate Professionals (NAHREP) is a non-profit trade association driving Hispanic homeownership and economic empowerment. With a nationwide network of professionals, NAHREP advocates for policies and provides resources that expand opportunities for Latino families to build wealth through real estate.

NAHREP and Realtors are the registered trademarks of National Association of Hispanic Real Estate Professionals and National Association of Realtors, respectively.
