

'On The Record with Christian Briggs' Reaches Top 10% of Podcasts Worldwide

SAN JUAN, PUERTO RICO, September 18, 2026 /EINPresswire.com/ -- "On The Record with Christian Briggs" Reaches Top 10% of Podcasts Worldwide

Economics and financial-policy program expands its audience across Apple Podcasts and other major listening platforms

On The Record with Christian Briggs has reached a new audience milestone, earning placement among the top 10% of podcasts worldwide, according to Listen Notes' Listen Score.

The recognition reflects the growing reach of a program dedicated to monetary policy, global finance, emerging technology, digital assets and the economic decisions affecting American households and businesses.

Hosted by economist and financial commentator Christian Briggs, On The Record examines complex financial subjects through long-form analysis designed to move beyond conventional headlines and abbreviated news coverage.

The show is available on Apple Podcasts, Spotify, YouTube and America Out Loud.

Building an Audience Through In-Depth Financial Analysis

The growth of On The Record comes as economic uncertainty, technological change and public concern about the future of money continue to shape national debate.

Recent episodes have examined Federal Reserve policy, government debt, inflation, Central Bank Digital Currencies, financial privacy, artificial intelligence, stablecoins, the CLARITY and GENIUS Acts, commercial real estate, regional banks and the changing role of the U.S. dollar.

Rather than treating these subjects as isolated developments, Briggs connects policy decisions with their potential effects on access to credit, purchasing power, personal wealth, business activity and financial independence.

The show's expanding audience reflects growing interest in understanding not only what is happening in the economy, but also how financial laws and institutional decisions may affect individuals over time.

"Reaching the top 10% is an important milestone for the program, but the larger goal has always been to give people the information they need to understand the systems shaping their financial lives, said Briggs "Listeners are looking for more than headlines. They want context, accountability and a serious examination of where these policies may lead."

Moving Beyond the Daily News Cycle

On The Record distinguishes itself through its focus on the infrastructure behind major financial and economic developments.

Episodes frequently examine the interaction between government policy, central banking, private financial institutions and emerging technology. The program also explores how systems created for efficiency or convenience could produce broader consequences for privacy, market access and individual control over money.

This approach allows the show to address immediate developments while placing them within a wider economic and historical framework.

Briggs presents his analysis in direct language intended to make complicated issues accessible to listeners outside traditional financial and policy circles. The program is designed for business owners, investors, working families and others seeking to understand how national and global economic decisions may influence their futures.

A Growing Multiplatform Presence

The podcast's rise has been supported by distribution across multiple audio and video platforms, allowing audiences to watch or listen in the format they prefer.

Apple Podcasts remains an important part of that distribution strategy, alongside Spotify, YouTube and additional podcast services. The show's expanding digital presence has also allowed individual episodes and shorter video segments to reach audiences beyond the

program's established subscriber base.

New listeners can explore episodes addressing monetary policy, digital finance, government debt, economic surveillance, international trade and other subjects affecting the modern financial system.

The top-10% designation represents a significant step in the program's continued development and provides a foundation for further audience growth.

Continuing the Conversation

As On The Record moves forward, Briggs plans to continue examining legislation, regulatory changes, financial technology and global economic developments that may receive limited attention in mainstream coverage.

Future episodes will remain focused on translating complex policy into practical consequences and identifying the questions that individuals, businesses and lawmakers should consider before new financial systems become permanently established.

"The financial world is changing quickly, and many of the most consequential decisions are being made before the public fully understands the systems being created," Briggs said. "On The Record exists to examine those decisions, challenge assumptions and help listeners understand what may be at stake."

On the Record with Christian Briggs

On the Record with Christian Briggs brings together thought leaders and economists to examine financial issues shaping our era. Each episode provides insights on economic trends and the importance of tangible assets for wealth preservation.

About Christian Briggs

Christian Briggs is a financial commentator, economist, and hard asset specialist who has advised members of Congress and the U.S. Senate on issues involving monetary policy, central bank digital currencies (CBDCs), hard assets, and global financial systems. As CEO of Hard Asset Management and a veteran of financial markets since 1987, Briggs brings decades of experience analyzing the intersection of economics, geopolitics, emerging financial technologies, and wealth preservation strategies.
