Announces November 2026 Launch as the First Company in the [BoardTech](#) Category

Conseleo logo

Emerging from a \$3.7bn global market heading toward \$7bn by 2032, Conseleo introduces BoardTech — AI board intelligence built for directors and executives, with zero-access data security and full European cloud sovereignty.

“

As a non-executive director, I began looking for AI tools built for board work. Nothing existed. So we built it. Conseleo does what legacy board portals aren't designed for”

Andy Wright

HUELVA, SPAIN — September 2026 — Conseleo, an AI-powered board intelligence platform, today announced a November 2026 go-live date and opened early access at [conseleo.com](#). The company is the first to operate within what it calls BoardTech — a distinct technology category serving corporate boards, non-executive directors (NEDs), and executive leadership, built to replace the legacy board portal market.

The global board portal market is currently valued at \$3.7bn and is projected to reach \$7bn by 2032. No technology company has named or claimed the category. Conseleo is doing so now.

"As a non-executive director, I began looking for AI tools built for board work," said Andy Wright, co-founder of Conseleo. "Nothing existed. So we built it. Conseleo does what legacy board portals aren't designed for: directors interrogating their board and committee packs and getting

cited answers — enriched with external data signals the pack itself doesn't contain."

Unlike legacy board portals — which are licensed to organisations and inaccessible to the individual — Conseleo serves both the board and the director. A NED sitting on three boards can bring Conseleo to all three. No IT department required. No procurement process. The director is the buyer.

The platform operates on a zero-access secure vault model. AI responses are grounded in cited sources, not generated assumptions. Infrastructure is hosted on private European cloud, giving organisations full control over their data at all times.

Conseleo is assembling a board of advisors, bringing together C-suite leaders and governance experts to guide the company's product direction and growth.

Early access is open now at conseleo.com.

About Conseleo

Conseleo is a board intelligence platform and the first company in the BoardTech category. Built for boards and the individual directors who sit on them — NEDs, iNEDs, Executive Directors, Chairs, CEOs, CFOs and compliance professionals across the UK and international markets. Zero-access secure vault. European cloud infrastructure. AI grounded in cited sources. Cited.
