AiDASH Announces Evolve 2027: PreventionFirst, Together – April 27–29, Chicago

Evolve 2027 brings utilities, regulators, and innovators to Chicago to advance the PreventionFirst™ movement and build a more resilient grid.

Evolve 2027 heads to Chicago, Illinois

PALO ALTO, CA, UNITED STATES, September 21, 2026 / EINPresswire.com/ -- AiDASH, the company leading the PreventionFirst movement for electric utilities and transforming grid resilience through its pioneering platform that unifies vegetation, asset, wildfire and storm intelligence, today announced Evolve 2027.

Evolve is the only global conference dedicated to securing the utility grid against the escalating risks of wildfires, storms, and climate-driven extremes.

Building on the success from two prior Evolve conferences convening pioneers from utilities, government, and technology, Evolve will return April 27–29, 2027, under the theme "PreventionFirst, Together."

Two years of Evolve conferences – bringing together utilities, regulators, and partners – have reinforced a single conclusion: the clearest path to Securing Tomorrow runs through prevention. Evolve now carries that identity forward, setting the standards and practices that define the PreventionFirst movement.

Evolve 2027 heads to Chicago, Illinois – a city where vegetation-driven risk, intensifying storms, encroaching wildfire smoke, and aging grid infrastructure all converge.

Evolve 2027 will be co-located with Schneider Electric's Digital Grid Innovation Days, which will run Monday, April 26, through Wednesday, April 28, 2027.

AiDASH's PreventionFirst approach is rapidly gaining ground across the utility industry. These

> We are proud to lead the PreventionFirst movement and present Evolve 2027 together with our partners and stakeholders, because the challenges utilities face today are larger than any one company."
>
> *Abhishek Singh, CEO and co-founder of AiDASH*

utilities are breaking down silos across programs and moving toward a more holistic view of grid performance, risk, and resilience.

"Utilities need a unified risk picture across programs and time horizons to take control over risks to the grid," said Abhishek Singh, CEO and co-founder of AiDASH. "We are proud to lead the PreventionFirst movement and present Evolve 2027 together with our partners and other stakeholders once again, because the challenges utilities face today are larger than any one company."

The conference will feature keynote sessions, customer case studies, panel discussions, and interactive product showcases that bring the PreventionFirst framework to life. Executives, regulators, and innovators from across the globe will gain exclusive insights into how utilities can reduce costs, improve reliability, and lower liability across their networks.

Save the date and indicate interest here.

About AiDASH

AiDASH is the company leading the PreventionFirst movement for electric utilities and transforming grid resilience through its pioneering platform that unifies vegetation, asset, wildfire and storm intelligence. Powered by SatelliteFirst™ Inspection & Monitoring, AiDASH delivers comprehensive visibility across the entire grid at the right frequency and budget, using the right data modality. More than 200 customers trust AiDASH to keep the lights on, spend where it counts, and defend every decision – Securing Tomorrow across every mile of the grid.
