Tesla Outsourcing Services LLC Strengthens US Presence with New Chicago Office

New Chicago office at 155 North Wacker Drive brings US-based account leadership to AEC clients, backed by the Offshore Delivery Center in India.

CHICAGO, IL, UNITED STATES, September 21, 2026 /EINPresswire.com/ -- Tesla Outsourcing Services LLC, a specialist BIM and CAD partner for architecture and engineering firms, has opened a new office in Chicago, Illinois, extending its on-the-ground presence in North America. Located at 155 North Wacker Drive, the office adds a dedicated point of contact for US clients alongside the company's existing offices in the United Kingdom and Australia and its Offshore Delivery Center in India.

> “Chicago isn't about adding production capacity; that stays in India. It's about putting project leadership in our US clients' time zone, so decisions keep pace with their schedules.”
>
> *Prex Poojara, Executive Director, Tesla Outsourcing Services LLC*

The opening reinforces a structure Tesla Outsourcing Services LLC has built over nineteen years - client-facing offices positioned close to the markets it serves, connected to a single, high-capacity unit where the technical work is actually produced.

The Chicago office gives existing and prospective clients across the Central and Midwest US a direct point of contact. It means closer coordination on active engagements, faster response on live projects and a familiar face for clients who, until now, have managed their Tesla Outsourcing Services LLC relationship primarily across time zones.

That local presence works in step with the same production team and quality standard that has supported Tesla Outsourcing Services LLC's UK and Australian client relationships for years, giving US clients a consistent point of contact backed by a consistent standard of delivery.

Three capabilities are central to why Tesla Outsourcing Services LLC is growing its US footprint now:

□ Scan to BIM, converting point cloud and reality-capture data into coordinated, construction-

ready models. This is work that depends on volume and consistency and benefits from a specialist team trained to a single standard.

 BIM Coordination, including clash detection and federated model review, runs as a structured checkpoint within the project timeline rather than a late-stage scramble before issue-for-construction.

 Dedicated Resource Arrangement, an embedded team model that functions as an extension of a client's own delivery capacity, scaled to project load without the overhead of direct hiring.

The Chicago office is aimed at stakeholders managing projects where coordination failures are expensive and schedules leave no room to absorb them. This includes developers and construction managers on high-rise and skyscraper builds, data center operators, infrastructure owners and engineering firms managing multi-phase, multi-discipline programs across years rather than months. For each of them, a Chicago-based account manager means faster response and clearer communication on a project's status, backed by the same standard of delivery that has supported over 10,000 projects worldwide.

The Chicago office follows Tesla Outsourcing Services LLC's 19th-anniversary milestone earlier this year, which marked the opening of its registered US entity. With that foundation in place, the physical office is the next step in a deliberate, staged expansion.

"Every client relationship we've built over nineteen years has depended on two things: the quality of what we deliver, and how easy we are to work with while delivering it. Chicago strengthens the second without ever touching the first. Our Delivery Center in India is, and remains, the engine behind every model and drawing we produce. Chicago is simply where more of our US clients can now come to talk to us," says Ketan Poojara, the Founder & Chief Executive Officer, Tesla Outsourcing Services LLC.

Tesla Outsourcing Services LLC is a specialist BIM, CAD and engineering design partner for AEC

firms across North America, Europe, the United Kingdom, Australia and the Middle East. The company operates client-facing offices in the United States, the United Kingdom and Australia, with all project delivery consolidated at its Offshore Delivery Center in India.

The firm has delivered more than 10,000 projects across architectural CAD, BIM modeling, MEP coordination, scan to BIM, 3D visualization and construction documentation. Tesla Outsourcing Services LLC serves 300+ client organizations across 25+ countries and manages 500+ project deliveries annually. All engagements are conducted under strict NDA and multi-tier QA/QC protocols, in compliance with ISO 19650 and applicable regional standards.
