

# Las Vegas Pizzeria Partners with IPTECHVIEW to Pioneer Supervisory AI, Perfecting Food Quality and Store Margins

*Mr. Jim's Pizza Franchise Owner Larry Harris Reports 43% Decrease in Preparation Errors & Six-Figure Operational Gain Using IPTECHVIEW Cloud Video Intelligence*

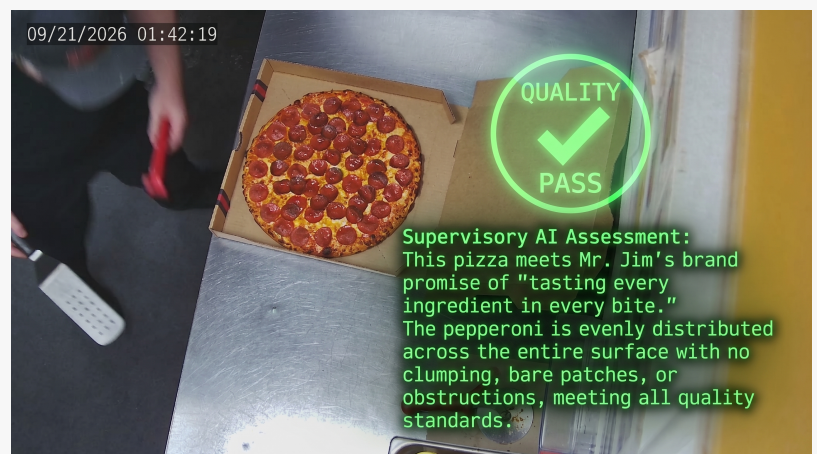

LAS VEGAS, NV, UNITED STATES, September 21, 2026 / EINPresswire.com/ -- [IPTECHVIEW](#), a developer of cloud visual intelligence and automated operational management platforms, partners with Mr. Jim's Pizza franchise operations in Las Vegas to deploy its Supervisory AI platform across quick-service restaurant (QSR) environments.

By deploying IPTECHVIEW's Supervisory AI platform, the pizza franchise owner has converted standard security camera infrastructure into an automated "Co-Pilot" management system that drastically improves food quality, streamlines kitchen workflows, and elevates total store valuation.

In the hyper-competitive QSR market, execution accuracy is the single greatest driver of customer retention. Industry metrics demonstrate that over 50% of diners switch to a competitor after a single disappointing meal, a figure that leaps to 86% after a second inconsistent

IPTECHVIEW, a pioneer in cloud-native video surveillance and AI-powered business supervision

IPTECHVIEW Supervisory AI in action: Automated back-of-house quality verification analyzes pepperoni distribution and bake consistency at Mr. Jim's Pizza in Las Vegas, where AI oversight helped drive a 43% drop in preparation defects.

experience. To eliminate quality variances, IPTECHVIEW's 3-in-1 AI camera solution - a zero-down, small-business-friendly system was implemented and provides front-of-house cleanliness oversight, security monitoring, and back-of-house automated quality checks for pizza toppings, dough docking, and proofing.

The platform's impact was immediate. Within 30 days of deployment, the store achieved a 43% reduction in pizza topping defects while curbing workplace cell phone distractions.

"As a multi-store owner, I can't be everywhere at once," said Larry Harris, owner of Mr. Jim's Las Vegas. "Thanks to IPTECHVIEW's automated and actionable 'Insights' and 'Analytics' reports, we were able to cut pizza topping errors by 43% in a single month and drastically reduced employee cell phone distraction. It's an indispensable tool for any operator looking to elevate quality and improve ROI across locations. If I had to do it all over again as a franchise owner, I would never buy a franchise that didn't use IPTECHVIEW."

Operating 24/7 without manual intervention, IPTECHVIEW's visual intelligence platform automatically detects queue bottlenecks, lobby clutter, and back-of-house execution issues. Mitigating these inefficiencies protects over \$184,000 in annual operational value per location, representing more than \$900,000 in added enterprise value for investors under standard market multiples.

"Larry is truly pioneering how modern pizzerias use AI-driven visual intelligence," said Walter Engelbrecht, Chief Operating Officer of IPTECHVIEW / ABP Technology. "While cameras have existed in kitchens for years, IPTECHVIEW elevates them into proactive operational partners that protect brand reputation, drive customer loyalty, and deliver measurable return on investment. We like to say we put the "AI" in "Pizza."
