Aryaka Wins Best in Remote Access Protection at the 2026 CybersecAsia Readers' Choice Awards

Asia-Pacific security practitioners vote Aryaka's Unified SASE as a Service the region's best defense for secure, high-performance remote access.

2026 CybersecAsia Readers' Choice Awards, Best in Remote Access Protection

SANTA CLARA, CA, UNITED STATES, September 22, 2026 / EINPresswire.com/ -- Aryaka®, the leader in Unified SASE as a Service, today announced it has won "Best in Remote Access Protection" at the 2026 CybersecAsia Readers' Choice Awards. Winners were announced at a ceremony held September 11 in Singapore.

The CybersecAsia Readers' Choice Awards are decided entirely by CybersecAsia's community of IT and security readers and subscribers, the practitioners who deploy and operate these technologies day to day. Nominating vendors do not vote on their own submissions, and vendor votes are excluded from the final tally, making the recognition a direct signal from the market rather than a vendor-driven claim.

> This award comes directly from the people who manage remote access every day, which is exactly why it matters."
>
> *Nitin Ahuja, VP & GM, APJ, Aryaka*

Nitin Ahuja, VP & GM, APJ at Aryaka, said the recognition reflects more than a category win. "Remote work isn't a temporary posture for our customers, it's the baseline. This win confirms that our Unified SASE approach gives IT and security teams secure, high-performance access without forcing a trade-off between the two."

The recognition carries particular weight for enterprises headquartered outside Asia-Pacific but operating within it. Network performance across the region is often the weakest link in a global

enterprise's infrastructure, where public internet backbones introduce latency and inconsistency that a North America or Europe-based WAN strategy doesn't always anticipate. Aryaka's Secure Remote Access and Universal ZTNA capabilities run on the company's Zero Trust WAN, a private global backbone spanning more than 40 points of presence that reaches 95% of the world's business population at sub-30ms latency. Rather than layering security on top of the public internet, Aryaka delivers networking, security, and observability as a single managed service, with the option to run it self-managed, co-managed, or fully managed. For distributed enterprises managing a growing remote workforce against a shrinking security perimeter, that convergence is the difference between adding another console and actually closing the gap.

Learn more about Aryaka's approach to secure remote access.

About the CybersecAsia Readers' Choice Awards

The CybersecAsia Readers' Choice Awards recognize the cybersecurity solution and service providers that have made the greatest impact on organizations across Asia-Pacific. Winners are selected solely by CybersecAsia's readers and subscribers; nominating vendors are excluded from voting on their own entries. The 2026 winners were announced at a ceremony held September 11 in Singapore.

About Aryaka

Aryaka is the leader in delivering Unified SASE as a Service, a fully integrated solution combining networking, security, and observability. Built for the demands of Generative AI as well as today's multi-cloud hybrid world, Aryaka enables enterprises to transform their secure networking to deliver uncompromised performance, agility, simplicity, and security. Aryaka's flexible delivery options empower businesses to choose their preferred approach for implementation and management. Hundreds of global enterprises, including several in the Fortune 100, depend on Aryaka for their secure networking solutions. For more on Aryaka, please visit www.aryaka.com.
