CloudOffix and ImageWare AG Join Forces to Accelerate AI-Driven Digital Transformation Across the DACH Region

COLUMBIA, MD, UNITED STATES, September 23, 2026 / EINPresswire.com/ -- CloudOffix, the AI-native business operations platform that unifies data, business applications, workflows and AI, has entered into a strategic partnership with ImageWare AG, a Swiss digital transformation specialist serving organizations across the DACH region.

Imageware Logo

Through this partnership, ImageWare AG will expand its solution portfolio with CloudOffix and support organizations in Germany, Austria and Switzerland as they modernize business operations, connect fragmented systems and deploy AI securely across their processes.

> Our partnership with CloudOffix represents an important expansion of the value we can offer our customers"
>
> *Hasan Irmak, CEO of ImageWare AG*

Founded in Switzerland in 1994, ImageWare AG has extensive experience in enterprise information management, business process digitalization, and implementing business applications for organizations operating in complex, regulated environments. Its consulting capabilities, technical expertise and established customer relationships across the region make ImageWare AG a strong strategic partner for CloudOffix's continued European growth.

CloudOffix provides a unified operational foundation through which organizations can run connected applications across sales, marketing, customer service, projects, HR and other business functions. Its AI assistants, voice agents and autonomous agents work directly with governed business data and workflows, allowing organizations to move beyond isolated AI experiments and implement AI within real operational processes.

The platform can also integrate with established enterprise systems, including SAP, enabling organizations to preserve their existing technology investments while connecting front-office operations, data and workflows around them. This is particularly relevant for companies across the DACH region, where SAP has a strong enterprise footprint and digital transformation initiatives often need to work within complex, established IT environments.

“Our partnership with CloudOffix represents an important expansion of the value we can offer our customers,” said Hasan Irmak, CEO of ImageWare AG. “Organizations are no longer looking only to digitalize individual documents or processes. They need to connect information, workflows, business applications and AI within a coherent and manageable architecture. CloudOffix complements our experience in enterprise information management and process digitalization and enables us to help customers build more intelligent, connected and future-ready operations.”

The collaboration will allow ImageWare AG to deliver CloudOffix-based solutions tailored to the operational, regulatory and technological requirements of organizations throughout Germany, Austria and Switzerland. Customers will benefit from regional consulting and implementation expertise alongside a flexible platform that can be adapted to different industries, processes and enterprise architectures.

The partnership is also an important step in CloudOffix’s European expansion. CloudOffix already has a dedicated sales team and organizational presence in Germany, reflecting the company’s long-term commitment to the region. By strengthening its local partner ecosystem, CloudOffix aims to provide DACH customers with closer market support, deeper implementation expertise, and solutions aligned with regional business requirements.

“The DACH region is a strategic growth market for CloudOffix, and our investment goes well beyond entering a new geography,” said Gokhan Erdogdu, CEO of CloudOffix. “We already have an established organization and sales presence in Germany, and we are continuing to expand our capabilities and partner ecosystem across Europe. ImageWare AG brings extensive regional experience, strong customer relationships and deep knowledge of enterprise information and process management. Together, we can help organizations connect their existing systems—including SAP—with an AI-native operational foundation and turn AI into a secure, governed and measurable part of everyday business.”

CloudOffix is already used by organizations across different industries to consolidate operational data, connect business functions, and manage end-to-end workflows on a common platform. Its integration capabilities allow enterprises to work with systems such as SAP, Oracle, Microsoft, Salesforce, Workday and other established business technologies without requiring organizations to replace their entire existing infrastructure.

By combining ImageWare AG’s regional expertise and customer-oriented consulting approach

with CloudOffix's unified data architecture, connected applications and embedded AI capabilities, the two companies aim to support sustainable and responsible digital transformation throughout the DACH region.

About ImageWare AG
ImageWare AG is a Swiss, owner-operated company headquartered in Ittigen near Bern. Since 1994, the company has supported organizations in digitalizing business processes and implementing enterprise information management solutions and business applications. ImageWare AG combines consulting, technology and solution architecture expertise to help customers transform information into accessible, usable organizational knowledge.
