Sterling Fleet Outfitters Launches Canadian-Made Upfit Packages for the Kia PV5 Cargo Van

New commercial van packages are designed specifically for the Kia PV5 and give Canadian fleets access to EV-safe trade-specific storage solutions.

SURREY, BRITISH COLUMBIA, CANADA, September 24, 2026 / EINPresswire.com/ -- Sterling Fleet Outfitters has launched a new line of Canadian-made commercial upfit solutions designed specifically for the Kia PV5 Cargo, Kia's new electric commercial van coming to the Canadian market.

Developed for the unique dimensions and configuration of the Kia PV5, Sterling's new upfit products are designed to help Canadian businesses maximize cargo space, protect the vehicle and create a professional mobile workspace.

> "The PV5 has a unique cargo area and wheel well design, so we developed products that make better use of that space while keeping the upfit lightweight, durable and professional."
>
> *Kathy Fowler, Marketing Manager*

The new Kia PV5 upfit lineup includes vehicle-specific shelving, no-drill EV flooring, protective wall lining and purpose-built packages for HVAC, electrical and plumbing professionals.

Rather than adapting equipment designed for larger cargo vans, Sterling developed components around the PV5's compact cargo area.

A key example is Packd™ C8 Series shelving, which uses specialized end panels designed around the Kia PV5's wheel wells. This allows shelving to fit closer to the vehicle walls, helping businesses make better use of the available cargo space while maintaining a clean, professional

installation.

EV-Safe Flooring Designed for the Kia PV5
Sterling has also developed a no-drill flooring system specifically for the Kia PV5.

Because the PV5 is an electric vehicle, eliminating drilling through the vehicle floor is an important consideration when designing an upfit. Sterling's system is installed without drilling through the factory floor to protect the EV battery.

The flooring is made from durable Zyply material to help protect the cargo area from tools, equipment, moisture, dents and everyday wear.

Kia PV5 Wall Protection
Sterling also offers PV5-specific wall lining kits provide additional protection for exposed areas of the cargo compartment.

The wall panels are designed around the vehicle's interior configuration and provide businesses with a durable, easy-to-maintain surface while giving the cargo area a finished, professional appearance.

Trade Packages for Canadian Businesses
Sterling is also developing complete Kia PV5 commercial van packages for HVAC, electrical and plumbing applications.
