Routes for Sale

Each Tower Beverage 30-account route is structured to provide the distributor with an initial retail account base along with hands-on training, field support and market-development assistance. Tower Beverage works with its distributors to help establish their first 30 retail accounts, giving new distributors a foundation from which they can continue adding customers and expanding their local distribution business.

For entrepreneurs researching Routes for Sale in Florida, beverage routes for sale, DSD routes for sale or distribution routes for sale, the Tower Beverage Program offers an alternative to purchasing a traditional established route. Instead of simply taking over someone else's existing route, distributors have the opportunity to develop their own business and expand their account base as their market grows.

"We don't want our distributors simply buying a job. We want to help them build a business," said Bill Richards, Founder and Owner of Tower Beverage USA. "Our team provides hands-on training, field support and market-development assistance. We put boots on the ground in our distributors' markets to help them establish a strong foundation for future growth."

Tower Beverage Sweet Seltzers are packaged in 12-ounce slim cans and are available in four flavors: Lemon Ginger, Coconut, Raspberry Lime and Tangerine. The beverage line is positioned for distribution through independent retailers and other qualifying retail accounts using the direct-store-delivery model.

The company's Florida expansion is intended to create additional opportunities for independent route operators, entrepreneurs and distributors seeking beverage distribution opportunities. Tower Beverage's 30-account routes for sale are priced at \$25,000 and include Protected Market Rights in writing, subject to market availability and the terms of the distributor agreement.
