PatientGain Eliminates Healthcare Website Headaches for Busy Practice managers with VaultDocSites™

The firm's $800/Month 'Done-For-You' Solution handles both HIPAA BAA and marketing

LOS ALTOS, CA, UNITED STATES, September 25, 2026 / EINPresswire.com/ -- PatientGain, a leader in healthcare marketing technology, today announced VaultDocSites™. This fully managed website framework is designed specifically for busy practice managers and owners who want to grow their clinic but lack the time or resources to deal with complex technology issues and shifting HIPAA digital marketing regulations like Google analytics.

VaultDocSites™ provides an all-inclusive, "Done-For-You" solution that handles website HIPAA compliant analytics, security and patient acquisition, backed by a comprehensive Business Associate Agreement (BAA).

For medical and dental practice owners, managing a practice website often turns into a stressful balancing act. Traditional web designers use platforms that require constant plugin updates, carry significant hacking risks, and can accidentally leak PHI-violating HIPAA laws. Practice managers rarely have the hours to audit code, fix broken pages, or verify that contact forms are securely encrypted.

VaultDocSites™, as a proprietary, fully managed model for secure healthcare websites, solves this problem by acting as a secure, hands-off portal. PatientGain's team completely manages the setup, optimization, and security, allowing healthcare providers to focus exclusively on patient care.

How VaultDocSites™ Removes the Operational Burden:
VaultDocSites™ removes operational burden in several ways:

Less Tech Hassle
Practice owners do not need to manage servers, update bloated plugins, or hire expensive IT consultants. PatientGain handles 100% of the practice website maintenance.

Instant, HIPAA Compliance with a comprehensive Business Associate Agreement (BAA)
Unlike standard websites that save medical inquiries in vulnerable databases, VaultDocSites™ immediately strips data off the site and routes it to the encrypted AWS platform. Every subscription comes with a signed Business Associate Agreement (BAA) covering patient PHI data.

Software Consolidation
The VaultDocSites™ PLATINUM service typically replaces 5 to 8 expensive, fragmented marketing tools by natively integrating over 20+ applications (including CRM, texting, Email marketing, secure analytics and chatbots) into one dashboard.

Fast Speed Testing
PatientGain ensures websites pass rigid speed testing requirements, bringing them in line with performance protocols and Google PageSpeed Insights. VaultDocSites™ 95% of sites load in 1.5 to 2.5 seconds.

Frontend for More Than 20 Integrated Applications
PatientGain websites natively replace between 5 and 8 different vendors.
