

# BIN95 Announces 40% Off Featured Industrial Training Site Licenses Through Year-End

*Unlimited learners at a licensed facility, everyday course savings, and an additional 40% discount give schools and companies lower-cost workforce training.*

ST. LOUIS, MO, UNITED STATES,  
September 29, 2026 /

EINPresswire.com/ -- Business Industrial Network (BIN95) has announced a 40% discount through December 31, 2026, on the individual course and training bundle Site and Enterprise Licenses featured on its [educational site-license page](#). The offer covers the page's automation control and related industrial maintenance training courses, including bundles that already carry an everyday package discount.

**Industrial training for unlimited learners**  
**40% off featured Site & Enterprise Licenses**

Individual courses + bundles • Through December 31, 2026

BIN95's featured course Site Licenses allow unlimited learners and installations at one licensed facility. An organization can train 20 people or 2,000 without buying additional learner seats. Enterprise Licenses extend that flexibility across unlimited locations. The courses are self-paced and can be used without an internet connection after initial installation, giving educators and employers flexibility in how they deliver training.

“

Many educators and employers don't realize they can choose perpetual training licenses that allow unlimited learners, rather than paying recurring fees or buying more seats as their programs grow.”

*Glinda Fitchett, Owner*

“Training costs should not keep rising every time another student or employee needs to learn,” said Glinda Fitchett, owner of Business Industrial Network. “Our site licenses let organizations train as many people as they need at their

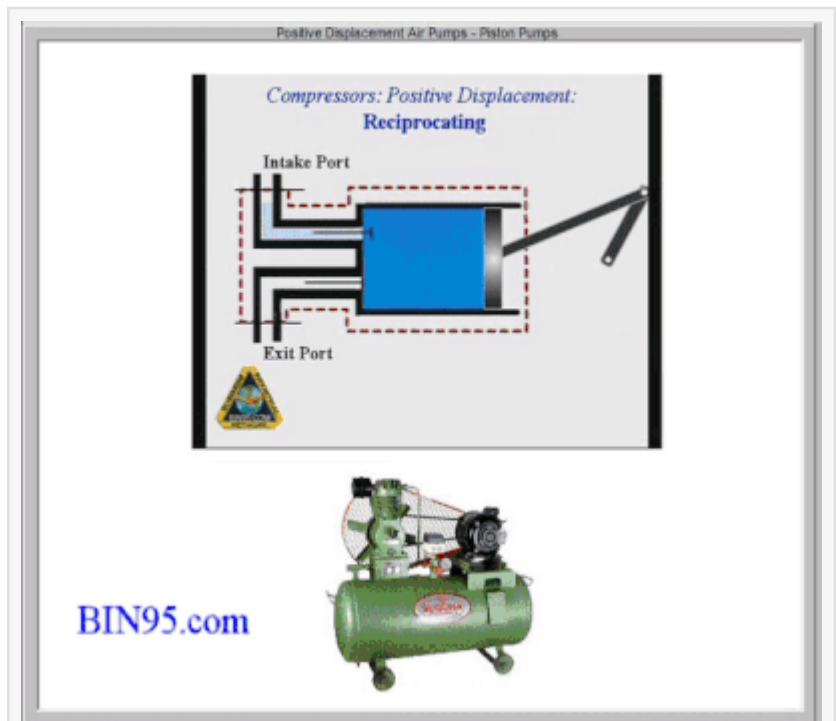

licensed facility. The 40% offer makes it more affordable to add the course topics their workforce needs.”

BIN95 also discounts bundles based on the number of different course titles an organization licenses. Its everyday bundle pricing offers savings of up to 36% compared with buying the included course licenses individually. The year-end promotion takes an additional 40% off the already-discounted bundle prices, as well as off the individual course licenses featured on the educational site-license page.

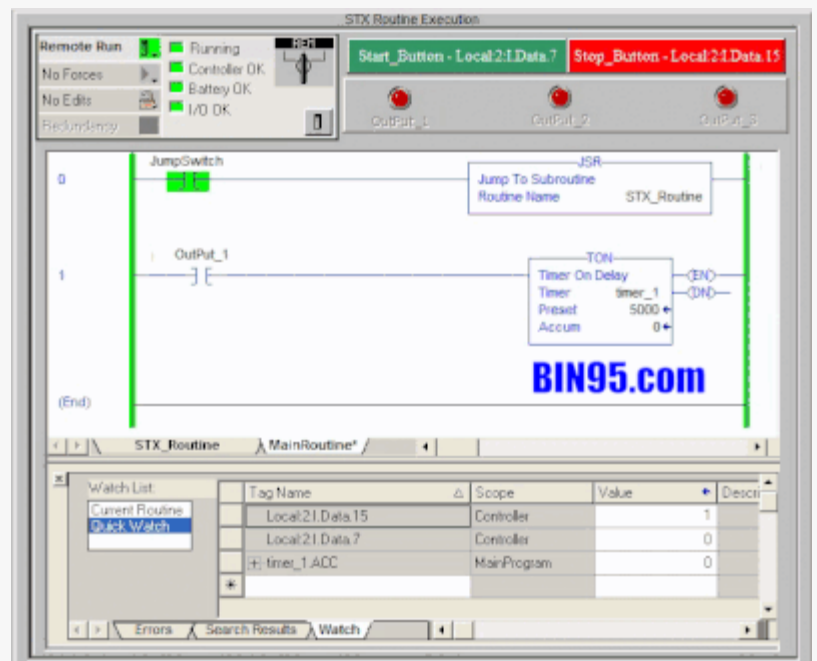

For example, an unlimited-learner Site License for the eight-course Maintenance Technician's Bundle is \$9,468 during the promotion, reduced from its regular bundle price of \$15,780. That regular bundle price already saves approximately 31% compared with buying its eight Site Licenses individually. With the additional 40% promotion, the \$9,468 price is 58.5% below the \$22,840 regular cost of those licenses purchased individually. The bundle covers PLCs, PACs, HMIs, variable-frequency drives, motors and controls, troubleshooting, DeviceNet, and fluid process training. It also includes one PLCLogix 5000 simulator installation.

Each training course stands on its own, with the simulations needed for that course built in. As an additional hands-on resource, educators can pair the PLCLogix 5000 simulator installation included with the bundle purchases with BIN95's recently released, freely accessible [Getting Started guide](#) and seven [PLC programming lessons](#).

Organizations can review published prices and request a formal quote through December 31, 2026. Discounted quotes issued during the promotion will be honored for up to six months from

Hydraulic course sample. All courses have many built-in simulators for hands-on practice and greater understanding.

Screen recording of one of many simulators built into the RSLogix 5000 course, demonstrating the range of courses from basic to intermediate training.

the quote date, allowing time for grants, institutional purchasing, and budget approvals. The 40% offer covers the featured course and bundle Site and Enterprise Licenses; additional simulator installation licenses retain their standard pricing.

For license details and bundle descriptions, visit BIN95's educational site-license page. To review prices or request a quote, visit the [Site and Enterprise License pricing](#) page.

#### About Business Industrial Network

Founded in 1995, Business Industrial Network provides self-paced industrial training in automation, electrical troubleshooting, and maintenance. Its training options include perpetual licenses for individual learners, schools, and companies with a single facility or multiple locations.
