The Mineral-Oil-Based Lubricants Market Is Projected to Grow at a 4.6% CAGR Through 2030

The Business Research Company's Mineral-Oil-Based Lubricants Market Report 2026 – Market Size, Trends, And Global Forecast 2026-2035

LONDON, GREATER LONDON, UNITED KINGDOM, October 2, 2026 /EINPresswire.com/ -- "The mineral-oil-based lubricants sector has shown consistent expansion over the past few years, fueled by multiple industrial and automotive factors. As industries continue to advance and vehicle numbers rise, the demand for reliable lubrication solutions remains strong. This overview explores the current market size, key growth drivers, and regional dynamics shaping the future of this vital lubricants market.

Mineral-Oil-Based Lubricants Market

The Business Research Company

Steady Market Growth Outlook for Mineral-Oil-Based Lubricants

The market for mineral-oil-based lubricants has experienced steady growth recently, with its value projected to increase from $33.66 billion in 2025 to $35.34 billion in 2026. This reflects a compound annual growth rate (CAGR) of 5.0%. The expansion during this period has been largely driven by increasing automotive production, rising vehicle ownership levels, expanded use of industrial machinery, and heightened demand for maintenance and lubrication solutions. Additionally, growth in manufacturing and heavy industry has further supported the rising adoption of mineral oil lubricants across various industrial applications.

Projected Market Size and Trends Through 2030
Looking ahead, the mineral-oil-based lubricants market is expected to maintain steady momentum, reaching $42.25 billion by 2030 with a CAGR of 4.6%. This future growth is attributed to the rising need for highly efficient lubrication systems, increasing emphasis on extending equipment lifespan and reliability, and wider adoption of advanced additive technologies. Other factors include growing industrial automation, expanding machinery usage, and demand for specialized lubricants designed for challenging operational conditions. Key trends anticipated to drive the market include formulations with enhanced performance, development of additives that extend lubricant drain intervals, low viscosity options that improve fuel efficiency, and improved thermal and oxidation stability.

Understanding Mineral-Oil-Based Lubricants and Their Composition
Mineral-oil-based lubricants are fluids derived from refined crude oil, primarily used to reduce friction and wear between moving mechanical parts. These lubricants are formulated by processing base mineral oils and blending them with various additives that enhance qualities like viscosity stability, resistance to oxidation, and thermal performance. This formulation ensures that mechanical components operate smoothly and are protected under diverse conditions.

Vehicle Ownership and Automotive Production as Major Market Drivers
A significant factor fueling the growth of the mineral-oil-based lubricants industry is the increase in vehicle ownership and automotive production. Vehicle ownership refers to the total number of privately and commercially operated vehicles on the road, while automotive production relates to the manufacture of passenger and commercial vehicles which require lubrication for their engines, transmissions, and associated mechanical systems. Rising urban mobility needs and expanding logistics activities, backed by higher disposable incomes and industrial growth, are driving this trend. Mineral-oil-based lubricants play a crucial role in minimizing engine wear, enhancing operational efficiency, and extending the lifespan of vehicles and manufacturing equipment.

An example of this trend is seen in the United Kingdom, where the Department for Transport reported that the number of licensed vehicles reached 42.3 million by the end of 2025, marking a 1% increase compared to 2024. This growth in vehicle numbers directly supports the rising demand for mineral-oil-based lubricants.

Regional Leadership and Growth Prospects in the Mineral-Oil-Based Lubricants Market

In 2025, Asia-Pacific held the largest share in the global mineral-oil-based lubricants market. This region is also expected to experience the fastest growth during the forecast period. The market report includes insights from several key regions such as Asia-Pacific, South East Asia, Western Europe, Eastern Europe, North America, South America, the Middle East, and Africa, providing a comprehensive global perspective on market trends and opportunities.

What's included in our 2026 market reports:

• Market attractiveness scoring and analysis
• Total addressable market (TAM) analysis
• Company scoring matrix graphics and tables
• Excel-based forecasting dashboards
• Market hotspots infographics
• Key technologies and future trend analysis
• Updated graphics and tables
