DreamSave Surpasses 50,000 Savings Groups, Reaching Nearly 1 Million Members Across 37 Countries

DreamStart Labs reaches a new milestone as savings groups across Africa, Asia, and Latin America increasingly adopt DreamSave to build digital records.

SAN DIEGO, CA, UNITED STATES, September 28, 2026 / EINPresswire.com/ -- DreamStart Labs, a social impact fintech focused on expanding financial inclusion through digital technology, has announced that more than 50,000 savings groups are now using DreamSave, representing nearly 1 million members across 37 countries in Africa, Asia, and Latin America.

> Reaching 50,000 savings groups is a significant milestone for DreamSave. It represents nearly one million people using digital tools to record and manage their financial activity."
>

The milestone reflects the continued adoption of digital tools by savings groups, which have traditionally relied on paper-based records to manage savings, loans, meetings, and other financial activities. DreamSave enables groups to record and manage these activities digitally, including in communities where internet connectivity is limited.

Reaching 50,000 groups also means that an increasingly large number of savings groups are building consistent digital financial histories. These records give groups and their partners greater visibility into their financial activity and create new possibilities for how savings groups engage with the wider financial ecosystem.

"Reaching 50,000 savings groups is a significant milestone for DreamSave, but what matters to us is what that number represents," said Mathisha Karunaratne, Product Manager at DreamStart Labs. "It represents nearly one million people using digital tools to record and manage their financial activity. Every group has its own needs and context, so our focus has always been on building something that is practical and useful in the everyday reality of savings groups. Reaching this scale shows us that there is a real need for technology that works with the way communities already save and manage their finances."

DreamSave is designed specifically for savings groups, with features that support the activities groups carry out throughout their savings cycles. Its offline-first functionality allows groups to continue recording meetings and financial activity without requiring a constant internet connection, while digital records help reduce manual calculations and errors and make group information easier to manage.

The milestone reflects the growing role of digital technology in strengthening the financial systems communities have already built.

About DreamStart Labs
DreamStart Labs is a social impact fintech building digital solutions that strengthen financial resilience for underserved communities around the world. The company's award-winning product ecosystem — DreamSave, DreamInsights, and DreamLink — helps informal savings groups digitize their operations, build credit histories, and access financial opportunities previously out of reach. DreamStart Labs is recognized among the top innovators advancing financial inclusion for more than 3 billion underserved people worldwide. Learn more at dreamstartlabs.com.
