Vantos Markets Selects Acuity's Event and Trade Intelligence Tools to Support Trader Research and Preparation

Agreement brings analyst produced technical research, automated pattern identification and economic calendar data to the UK-focused broker's client offering.

LONDON, UNITED KINGDOM, September 29, 2026 /EINPresswire.com/ -- Acuity Trading Limited today announced that Vantos Markets has selected its Event and Trade Intelligence offering, incorporating Human Technical Analysis, automated Patterns tools and Economic Calendar data. The partnership supports the broker's focus on providing UK traders with research and analytical tools to inform their own trading decisions.

The Human Technical Analysis research is provided by Acuity Research Limited, which is authorised and regulated by the Financial Conduct Authority under firm reference number 787261. Acuity Trading Limited is not authorised or regulated by the Financial Conduct Authority.

Vantos Markets (UK) Limited is a UK broker authorised and regulated by the Financial Conduct Authority. The company places clear communication about the realities and risks of trading at the centre of its approach. The agreement will support its aim of helping clients evaluate trading ideas, examine technical patterns and prepare for scheduled economic announcements.

Through the partnership, Vantos Markets is integrating three distinct capabilities into its client offering:

- Human Technical Analysis will provide analyst-produced, non-personalised market research to help clients evaluate trade ideas and understand the analysis supporting them.
- Patterns will use automated technology to identify chart formations that clients can consider as one input in their own analysis.
- Economic Calendar data will highlight scheduled announcements that could affect market conditions, helping traders consider event risk alongside technical research.

The tools provide general, non-personalised market analysis and information. They do not take account of an individual client's objectives, financial circumstances or needs and do not constitute investment advice or a personal recommendation.

Together, the Event and Trade Intelligence capabilities will give clients additional information to support their research and preparation. Markets remain unpredictable, and access to research, data or analytical tools does not eliminate trading risk or guarantee any particular outcome.

Robert Woolfe, Managing Director of Vantos Markets;
“Being brutally honest about trading starts with acknowledging that markets are unpredictable and that losses are a real possibility. Our role is to give clients practical tools and information that can help them prepare, evaluate the available evidence and make their own decisions.
“Our agreement with Acuity supports that approach. We want clients to be able to examine the reasoning behind a trade idea, review automatically identified technical patterns and recognise when an economic announcement could affect a position. These tools do not provide personal advice or certainty, but they can help traders challenge their assumptions and decide for themselves whether to act or step back.”

Andrew Lane, CEO of Acuity Trading and MarketReader;
“Vantos Markets’ emphasis on preparation and clear communication fits closely with our approach to trading intelligence. Research and analytical tools should provide useful context that traders can consider when evaluating an idea and the factors that may affect it.
“By bringing together analyst-produced technical research, automated pattern identification and economic calendar data, Vantos will enable clients to examine trade ideas alongside scheduled event risk. The tools provide non-personalised market analysis rather than investment advice, supporting a more informed and considered approach to independent decision-making.”

For Vantos Markets, the partnership forms part of its focus on integrating tools that serve a practical purpose for clients. Acuity’s Event and Trade Intelligence capabilities will support clients’ preparation by helping them review technical research, examine automatically identified chart patterns and monitor scheduled economic announcements as part of their own analysis.

For Acuity, the agreement extends its work with brokers seeking to incorporate research, market data and analytical tools into their client offering.

Regulatory information
Human Technical Analysis research is provided by Acuity Research Limited, which is authorised and regulated by the Financial Conduct Authority under firm reference number 787261. Acuity Trading Limited is not authorised or regulated by the Financial Conduct Authority.

The tools and information described in this release provide general, non-personalised market analysis and do not constitute investment advice, a personal recommendation or an offer or solicitation to buy or sell any financial instrument. Trading involves risk, and past performance or previous market patterns are not reliable indicators of future results.
