Kanerika Strengthens Enterprise Data & AI Capabilities with 250+ Certifications Across Microsoft, Databricks, Snowflake

Certified platform expertise helps enterprises reduce complexity, accelerate modernization, and build scalable foundations for analytics and AI

TEXAS, TX, UNITED STATES, September 29, 2026 /EINPresswire.com/ -- Kanerika, an AI-first technology consulting firm specializing in enterprise data modernization and agentic AI, announced that its teams have achieved more than 250 technology certifications across Microsoft, Databricks, and Snowflake.

As organizations invest in cloud data platforms, analytics, and AI, many face challenges around technology choices, governance, migration complexity, and successful adoption. The right partner provides more than platform knowledge. Partners such as Kanerika provide experienced teams that understand enterprise environments and can translate technology investments into measurable business outcomes.

This milestone reinforces Kanerika's position as a trusted Data and AI partner, combining certified platform expertise with enterprise delivery experience across Microsoft, Databricks, and Snowflake.

"Our investment in upskilling & certifications reflects our commitment to building expertise across the platforms that power modern enterprises," said Samidha Garud, CEO of Kanerika. "As organizations accelerate data and AI initiatives, our teams bring the technical knowledge and delivery experience needed to help customers achieve measurable business outcomes."

11 Years of Building Enterprise Technology Expertise

Over the past 11 years, Kanerika has grown into a global Data and AI services firm supporting organizations across data platforms, analytics, and AI initiatives.

With a team of 400+ professionals supporting 150+ enterprise clients, Kanerika has continued to invest in technical skills, platform knowledge, and delivery capabilities. The achievement of 250+ certifications reflects their long-term commitment to building teams prepared for the evolving needs of enterprise technology leaders.

Enabling Enterprise Success Across Modern Data Platforms

For organizations investing in modern data platforms, selecting the right technology is only the first step. Kanerika's certified teams help enterprises design, implement, and optimize these platforms to drive measurable business value through:

- Enterprise data platform architecture and design
- Data engineering, analytics modernization, and AI enablement
- Governance, security, and compliance implementation
- Production deployment and platform optimization
- Automated data platform migrations powered by FLIP

With experience across Microsoft, Databricks, and Snowflake ecosystems, Kanerika helps enterprises make informed technology decisions, reduce implementation complexity, and build scalable data foundations aligned with their business goals.

Customer Outcomes Powered by Engineering Excellence

Kanerika's platform expertise has helped organizations achieve measurable improvements across industries:

- FoodPharma, a global food manufacturer: Unified six operational systems on Microsoft Fabric, reducing reporting timelines from two business days to 90 minutes.
- Healthcare provider: Migrated analytics workloads from Informatica to Databricks, improving reporting accuracy by 71% and reducing data costs by 38%.
- Beverage manufacturer: Replaced SSAS with Snowflake and Power BI, reducing manual reconciliation by 60%.

About Kanerika

Kanerika is a Data and AI services firm headquartered in Austin, Texas, with delivery operations across India and Singapore. Founded in 2015, Kanerika delivers data platform modernization, migration, and applied AI programs for 150+ enterprise clients through a team of 400+ professionals.

Kanerika holds partnerships with leading technology providers including Microsoft, Databricks, and Snowflake. The company also holds ISO 27001, ISO 9001:2015, and ISO 27701:2019 certifications, along with SOC 2 Type II and CMMI Level 3 appraisal.
