

Fabric Joins Anthropic's Claude Partner Network

Fabric brings its experience transformation and AI expertise to Anthropic's enterprise partner network.

NEW YORK, NY, UNITED STATES, September 28, 2026 / EINPresswire.com/ -- [Fabric](#) today announced it is officially part of [Anthropic's Claude](#) Partner Network.

Fabric helps organizations thoughtfully deploy Claude to create better experiences for customers and employees. Taking a holistic view of how work gets done, Fabric helps leaders determine where people bring judgment, empathy and expertise, where AI can take on or support tasks, and how they can work together effectively. The goal is to apply Claude in ways that improve experiences and deliver practical business value.

This approach aligns with Anthropic's goal for the Claude Partner Network: helping enterprises identify where Claude can be valuable and put it to work in their organizations.

"Joining the Claude Partner Network is a natural fit for Fabric," said Keith Pine, Managing Partner and co-founder of Fabric. "We've built our business around transforming customer, employee and patient experiences. Bringing Claude into that work gives us another way to help organizations rethink how work gets done and create better experiences for all."

Fabric's Claude services include enterprise AI strategy, workflow transformation, agentic workflow and knowledge system design, and the governance and operating models needed to support responsible adoption.
