Activu Launches vis/ability® Academy, an On-Demand Training Platform for Command Center Operators

Self-paced courses and video modules give vis/ability users a way to build skills without waiting on live training or support calls

ROCKAWAY, NJ, NJ, UNITED STATES, September 28, 2026 /EINPresswire.com/ -- Activu today announced the launch of vis/ability® Academy, a new on-demand training platform for users of its vis/ability command center software. The platform is designed to close a common gap in critical operations: control room operators are typically trained through occasional live sessions, static documentation, and support calls—resources that aren't always convenient for critical teams' schedules, and make materials challenging to reference when a timely response is required.

> Vis/ability Academy puts live training and documentation in operators' hands whenever they need it. It's a meaningful shift for teams running some of the most demanding control rooms in the country."
>
> *Justin Gross, Director of Professional Services at Activu*

vis/ability Academy offers users a growing library of step-by-step courses and reference videos, covering everything from virtual and physical video wall setup and templating for fast context changes, to advanced automations and remote content-sharing driven by alerts generated by other third-party platforms. Courses are available on demand, and taken at the user's own pace. In-progress courses save the user's place for later, while completed courses remain available for review, and each finished course earns a certificate operators can use to track their own progress.

A new library of reference videos enhances learners' experiences in vis/ability Academy, and encourages them to confidently experiment in their vis/ability system.

"Live training and documentation alone weren't enough to get our customers using the full depth of vis/ability. vis/ability Academy puts that knowledge in operators' hands whenever they need it. This is a meaningful shift for teams running some of the most demanding control rooms in the country," said Justin Gross, Director of Professional Services at Activu.

vis/ability Academy is available as an enhancement for all Activcare Support subscriptions. https://www.activu.com/visability-academy Contact Activu's Professional Services team for more information and pricing.
