

OneSpring Named an OpenAI Select Partner

OneSpring joins the OpenAI Partner Network to help organizations turn AI goals into practical, working solutions.

ALPHARETTA, GA, UNITED STATES,

September 29, 2026 /EINPresswire.com/ -- OneSpring, an AI and digital product consultancy that helps organizations modernize outdated systems and software, today announced that it has been named an OpenAI Select Partner within the [OpenAI Partner Network](#).

“

Business leaders do not need another AI experiment that never makes it into everyday work. They need solutions that solve real problems and teams that know how to use them.”

*Jason Moccia, CEO of
OneSpring*

The OpenAI Partner Network is a global program for partners to build, sell, and deliver AI solutions with OpenAI. It brings together partners with deep industry expertise, delivery capabilities, and customer relationships while equipping them with resources, enablement, and support to help enterprises adopt OpenAI frontier models and products and turn them into measurable impact.

As an OpenAI Select Partner, OneSpring will continue working with OpenAI to help organizations build, deploy, and scale AI solutions responsibly and effectively. This work will help organizations apply GPT-6 Astra and other

OpenAI models to everyday business operations, using advanced reasoning and computer-use capabilities to carry out complex workflows with human oversight. OneSpring combines strategic advisory, human-centered product design, and hands-on engineering to help business leaders identify the right opportunities, build AI-enabled products and agents, and support adoption across their teams.

“Business leaders do not need another AI experiment that never makes it into everyday work. They need solutions that solve real problems and teams that know how to use them,” said Jason Moccia, CEO of OneSpring. “Being named an OpenAI Select Partner strengthens our ability to bring strategy, design, and engineering together with OpenAI’s technology. Our focus is helping clients modernize systems, reduce time-consuming work, and turn promising ideas into useful products, with responsible implementation and human oversight built in.”

OneSpring combines digital strategy, AI advisory, product design, software engineering, and AI adoption support to help leaders and teams solve complex business challenges. The company

works with a broad range of clients, from midsize businesses and large enterprises to government agencies, helping them modernize systems, build better digital products, and improve how work gets done. OneSpring also helps engineering teams integrate coding agents into their development practices with clear standards for security, testing, code quality, and human oversight.

Looking ahead, OneSpring plans to expand its OpenAI-related offerings and team enablement, helping customers move from initial opportunity assessment to working applications, connected workflows, and sustained adoption. The goal is to make AI useful in the systems people rely on every day and connect each implementation to clear business outcomes.

About OneSpring:

OneSpring helps organizations modernize outdated systems and software with AI, build better digital products, and improve how work gets done. The company combines digital strategy, user research, UX/UI design, and software engineering to turn complex business challenges into practical, working solutions. With 20 years of human-centered design experience, OneSpring brings strategic consulting and hands-on delivery together, from discovery through development, launch, and adoption.
