Amplyfy, Inc Team Attends the Meghan Rose Bradley Foundation Gala

Amplyfy, Inc Attended the Meghan Rose Bradley Foundation Gala for the 5th Year in a Row Showing Their Continued Support to Pediatric Brain Cancer research.

Our Admin and Top Leaders in Attendance at The Gala

WOODBRIDGE, NJ, UNITED STATES, September 29, 2026 / EINPresswire.com/ -- Amplyfy, Inc is proud to support the Meghan Rose Bradley Foundation and its ongoing mission to raise awareness and fund research for pediatric brain cancer. Members of the Amplyfy, Inc team recently attended the Foundation's annual gala, joining families, community members, and supporters in honoring Meghan Rose Bradley's legacy and helping advance research that could make a difference in the lives of children and families affected by brain cancer.

The Meghan Rose Bradley Foundation was established in December 2004 in memory of Meghan Bradley, who passed away from brain cancer in November 2004. Since its founding, the organization has worked to increase public awareness of pediatric brain cancer through education and advocacy while raising funds for research aimed at improving treatment and saving children's lives.

Pediatric brain cancer remains an important area of medical research. According to information published by the Meghan Rose Bradley Foundation, approximately 3,140 children under the age of 20 are diagnosed with primary brain tumors each year, including approximately 2,000 children ages 16 and under. The Foundation also notes that researchers continue to investigate potential genetic and environmental factors associated with these tumors.

Supporting research is at the heart of the Foundation's mission. The Foundation currently supports research led by Dr. Ulrike Gerdemann at Boston Children's Hospital, focused on improving immunotherapy for brain cancer. The research is examining why certain brain cancers can evade targeting by killer T cells and exploring ways to modify existing immunotherapies to

make them more effective against a broader range of brain cancers.

“Being part of an event that brings people together around such an important cause is incredibly meaningful to our team, hence why we go to every event they host and have been able to build such a strong relationship with the founders of the foundation” said Andrew K, Regional Manager of Amplyfy, Inc. “The work being done to increase awareness and support research gives hope to children and families facing pediatric brain cancer. We are honored to stand alongside the Meghan Rose Bradley Foundation and contribute to a mission focused on creating a brighter future for children.”

For Amplyfy, Inc, participation in the gala represents more than an evening of community engagement. It reflects the company’s commitment to supporting organizations that make a meaningful difference in the communities where its employees live and work.

The Meghan Rose Bradley Foundation continues to build upon Meghan’s legacy by combining education, advocacy, community support, and research funding. Through events such as its annual gala, the Foundation brings supporters together to help advance its mission and maintain hope for children affected by brain cancer.

Amplyfy, Inc is grateful for the opportunity to support the Meghan Rose Bradley Foundation and looks forward to continuing to participate in initiatives that give back to the community and support meaningful causes.
